## WATER BILL APPROVED

## Allows Forming of Districts

---

Assembly Votes 63 to 2 on  
Proposal Turned Down in  
Last Legislature

### Measure Enables Cities to Create Projects Due to River Development

[illegible]

The districts would have the usual power of municipal corporations, including right to exercise the power eminent domain, power to join

tion of one or more public corporations for the purpose of carrying out the powers, to acquire water and water rights within and without the state, to develop, store and transport water, and to sell water at wholesale rates. The purpose of the bill is to propose and fix rates therefor. Bond issues may be raised, assessments made and taxes levied. Other details may be amended. Each district may be authorized to make and withdraw by a majority of votes of the voters in the sections involved.

**ROLL TO TAX TRUCKS ON EIGHT PASSES ASSEMBLY**

**SACRAMENTO, April 21. (P) —** The city Senate bill providing for a tax on motor trucks based on their lights, today passed the Assembly by a vote of 51 to 22.

An attempt by the San Francisco

negation to amend the measure by requiring trucks operating in cities exclusively and not using State highways to pay only half of the

Proponents of the measure maintained that it is unfair to place a tax on the proceeds of which go to the state highway fund, on trucks which do not use the State highways. Assemblyman Walter Duval, who introduced the bill in the Assembly, declared that if certain trucks were exempted from the full tax, as the amendment proposed, that the measure would probably be unconstitutional.

## North Promised

## Sunshine After Light Rainfall

SAN FRANCISCO, April 27. (Exclusive)—A disturbance which has been forming in the Gulf of Alaska several days moved on to the continent last night, bringing rain

the West Coast as far south as San Francisco Bay, and then continued eastward. It will be followed, recaster Reed said, by sunshine and warmer temperatures tomorrow.

Arkansas River Again Rises;  
Refugees of Yazoo Now  
Placed at 28,500

(Continued from First Page)

said, "There seems to be nothing else to do but devote our efforts to getting the people out of the affected area to refuge camps. Hundreds of trucks, moving vans and army transports are bringing out refugees and all should be safe and comfortable in camps here by Friday noon."

In view of the possibility of trouble in the Yazoo valley, engineers declined to say how the crevasse that will release the flood waters would be created.

"We will not reveal our plans until they are carried out," Col. Marcel Chassey, former chief engineer of the levee board and closely connected with plans for the break, said, "in view of the possibility of trouble in carrying out the plans should they be made known."

While plans were being worked out to release New Orleans from the impending flood, the battle with the rising river continued with unabated ferocity up the river and along the tributaries of the Mississippi.

Strenuous activity was necessary to quell a threatened break at Glacé plantation, about thirty miles south of Vidalia, when the levee began to give. Several hundred men were thrown to work and a break prevented. Other weak spots, developing along the line, brought the possibility of a break in the chain before the premeditated one at Poydras Friday.

At points along the water front in New Orleans seepage has been steadily coming through the levee walls and the days the water has been held back at spots by revetments and sandbags. The seepage, engineers said, was not dangerous but it gave rise to occasional reports that the water was flowing into the city or that levees were giving way.

### OTHER AREAS FLOODED

Three thousand additional acres of plantation lands were added to the already flooded area in Red River parish when the water has been held back at spots by revetments and sandbags. The seepage, engineers said, was not dangerous but it gave rise to occasional reports that the water was flowing into the city or that levees were giving way.

At noon the only buildings that had not been reached were a store, the depot and two residences, but with the rise of the river, these were expected to be flooded.

Approximately 1,000 persons, many of them old workers, fled to the hills. The overflow began to flood that region two days ago. The levee cracked along the Louisiana Railway and Navigation Company.

Good transportation was the only means of reaching Crichfield, but the persons in the town were not believed in any danger.

A hundred and fifty persons had been driven from their homes in another section of Red River parish and were seeking safety on Butler Hill, a few miles from Crichfield. No loss of life was reported there.

Other towns in the region reported inundated included Abington, Grand Bayou and West Delta, and virtually all the residents of the towns had been forced to seek safety on higher ground.

Reports from Arroyo said that 50 families of refugees were being cared for at Marksville, and other places in that parish while 100 others were camped at Deville, La., and were in need of assistance.

Baton Rouge, situated on a bluff above the river and safe from flood damage, broadcast an invitation to refugees of flood-stricken areas to seek safety there. The State Board of Liquidation met there today and will ask the Legislature to authorize Gov. Simpson to borrow \$500,000, or as much of that sum as might be needed to bear the State's share of the expense.

### ARKANSAS AGAIN RISES

AND CREATES MORE HORROR

MEMPHIS, April 22.—As food supplies continued to inundate additional towns and farms in Southern Arkansas and the Mississippi Delta, Red Cross agencies were bending every energy to relieve situations there described in official reports as desperate.

Rising water from the Arkansas River reached more towns and villages today, and increased the depths at Arkansas City and other places where large numbers of refugees were gathered. Hundreds who had sought safety in McGeeville abandoned that town and fled to Monticello, where more than 5,000 homeless already were being cared for.

### NONE GO HUNGRY

Although the problem of providing food and shelter for the refugees is a tremendous one, the Red Cross National Guard and other relief agencies reported no one was going hungry or suffering from want of clothing or shelter.

Across the Mississippi in the delta section the food situation was gradually pushing out the huge lake in the lower Yazoo valley. Flooding half a dozen more towns, making a total of more than a score now partially under water.

Reports here showed 28,500 refugees concentrated in six towns in the delta with 8,000 at Greenville, 9,000 at Cleveland, 6,000 at Leland, 2,000 at Osbell, 2,500 at Deason and 3,000 at Beulah.

First reports of looting but on a comparatively small scale, came today from Greenville. Several negroes were arrested after they were found sneaking into stores and the military authorities announced that a "check curfew" would be beginning tonight.

### FLOOD ONUS ON DENUDING OF FORESTS

Orta Monnette Tells Civic Club Reason for Great Mississippi Rise

Orta Monnette, banker, in address to the executive council of the Civic Federation Club at the

club yesterday, said the disastrous flood in the Mississippi valley is due to lack of foresight and intelligent action by citizens of former generations.

"The wasteful denudation of the hills and mountains of Minnesota has resulted in one of the most terrible catastrophes in the history of the country," said Monnette.

"We have burned and wantonly destroyed. In other words, we have given up the rich timber lands God gave us."

"This is American Forest Week, yet few of us consider it as anything but a series of holidays in which to listen to sentimental

speeches and to sponsor a course of free lectures in the interest of better government," Mr. Bay said.

"This is American Forest Week, yet few of us consider it as anything but a series of holidays in which to listen to sentimental

## "TIMES" FUND FOR RELIEF OF FLOOD VICTIMS

The Times, which started the Los Angeles fund for the relief of the Mississippi Valley flood victims with a contribution of \$1000, will receive, acknowledge by publication and forward to the Red Cross any contributions sent to this paper. Checks should be made payable to The Times Flood Relief Fund and mailed to The Times, Los Angeles, Cal.

The flood situation grows daily more appalling. The number of refugees is now estimated at 200,000 with a death list and property loss which cannot yet even be approximated. The need is desperate and The Times urges all who are able to contribute any amount to do so as quickly and as generously as possible.

If preferred, contributions may be sent direct to the local Red Cross, Transportation Building, Los Angeles.

With a number of contributions still untabulated The Times fund stood as follows at 3 p.m. yesterday:

## CALLES HOLDS WAY CLEAR TO FULL AMERICAN AMITY

### Agrees With Coolidge Main Point Was Over Confiscation Threat, Now Completely Removed

MEXICO CITY, April 27. (AP)—President Calles believes that the road has been opened for a satisfactory settlement of all difficulties between Mexico and the United States. He emphasized this in commenting on President Coolidge's New York speech and said that at the bottom of all the difficulties "there is nothing more than a misunderstanding or divergence of judgment in appreciating a matter of legal order, which really had not affected the legitimate interests, nor, fortunately, injured the sentiment of the nation, nor brought any injury to our decorum."

"There may have been, there may continue to be, divergencies or interpretations of a technical nature in study, not such as to much as regards practical results which the laws may produce, but as the ideological conception which has given them life. But applications of those laws translated into facts has not resulted, nor do we intend that it shall result, in material injury to the principles invoked."

Asked his opinion relative to President Coolidge's mention of the origin of the difficulties with Mexico, President Calles declared:

"I believe he spoke of claims which over a long series of years were referred to as damages, either as regards American lives or property, which, due principally to revolutionary acts, have been, and will be, judged by general and special commissions which are functioning."

"According to the newspaper version of President Coolidge's speech, he traces the origin of the intensification of the difficulties to promulgation by the Mexican government of laws which Washington considered practically menacing confiscation of American property. Fortunately, due to correct understanding and exact comprehension of our purposes and the scope of those laws, President Coolidge in his speech showed a thorough understanding that Mexico never proposed, and never will propose, to confiscate foreign property. As I clearly expressed it at every opportunity, the policy and its expression by means of laws have never had either the spirit nor intention of confiscation."

President Calles declared that the Mexican government has never denied compensation naturally within the government's power, having regard to the economic situation. It is very satisfactory for me to note that Mr. Coolidge remembers that the American government agreed to accept bonds issued by the Mexican government in payment for damages admitted by the respective commissions in cases in which lands were taken for division.

Asked his opinion on the arbitration question, President Calles declared that Mexico at the present time had two commissions arbitrating with the United States, and in general principles Mexico always had been and would be a partisan of such remedy.

"But," he added, "that does not imply a desire on our part that any particular difficulty should be resolved by that procedure, as it appears to us perfectly satisfactory that such settlements should be obtained by means of negotiations, which would have the advantage (as it is the strict sovereign privilege of a country to draw up its own constitution and promulgate its own laws) of not injuring the sovereignty of the country, as it would be submitting to arbitration difficulties emanating from our Constitution and our laws."

Regarding President Coolidge's statement that the United States felt a moral responsibility for the country north of the Panama Canal and the decision to discourage revolutions in those countries, President Calles believes that the President's attitude is in accord with strict moral rectitude.

"It would indeed be immoral and an evidence of absolute lack of honorable government," he declared, "to incite or stimulate revolutions against recognized governments."

**RESERVE LAND RIGHTS**  
As for President Coolidge's condemnation of land monopolies and suggestions for settlement of the land problem, he was sincerely appreciative that Mr. Coolidge showed sympathy toward our efforts to obtain division of large estates for the benefit of the Mexican community.

"Naturally," he went on, "we reserve the right to judge what are most practical methods for carrying out or realizing the desideratum of increasing the number of Mexico's land owners. Laws, which have not been elaborated by revolution or cabinet meeting, but imposed upon us by realities peculiar to our national life, and very different from the condition of the rural population of the United States, are being applied."

"I repeat once more, with due respect to the principles of international order, that whether dealing with our own or foreign interests, we are only seeking the collective good and without denying compensation established by laws, which is offered to the full extent permitted by the economic situation of the country."

Speaking about North American rights in Mexico, President Calles said:

"President Coolidge's thesis appears irreproachable. When citizens of one country go to a foreign land, they should do so understanding they must abide by the laws of that country, but this submission does not imply their loss of benefits established by international right."

**PRIVILEGES IN PRINCIPLES**  
"I believe apart from concrete principles established by the laws of a country, there may in fact there are, privileges derived from principles which are expressly consecrated by international right, and from this viewpoint, the protection of the government of any country, whether weak or strong, for its citizens residing in another country is just, and I want to make explanations on this point. It is true and clearly explained by human nature that when citizens of a strong country reside and acquire property in a weak country they should have recourse to their governments for any real or supposed violation of their rights prior to exhausting the resources provided by the laws of the country where they are living."

"This undoubtedly leaves (when improper notice is taken of their demands by the chancellery of the strong country or there is too much generosity) the way open to painful situations. For the weak country, and to unjust, intolerable disdain of nationals of a strong country who find their protection easier and more opportune by the chancellery of their own country than by the legal resources of the country in which they reside, thus contributing either sooner or later to creating painful relations between nations having perfect community of sentiments and intentions."

"However, these difficulties are not in reality important when the governments of either the weak or strong nation have a consciousness of responsibility of government and a firm desire not to injure the just rights of anybody."

"Referring to the now concrete case of Mexico and the United States—as this consciousness of responsibility and intention of honorable government exists on both sides, as spiritual and commercial rapprochement becomes greater day by day, and as at the bottom of the difficulties there is nothing more than misunderstanding or divergence of judgment in appreciating today on President Coolidge's New York speech:

"This idea, it continues, has replaced preceding matters of legal order, the

## LACK OF MUFFLER ON HENS SENDS NEIGHBORS TO COURT

KANSAS CITY (Mo.), April 27. (Exclusive)—The desire of Dr. Arthur D. Ratta, Kansas City dentist, always to have fresh eggs is a worthy one, his neighbors agree. But obtaining the eggs without putting a muffler on his hens is another matter. Over that issue an entire neighborhood of sixty residents went to court here and got what they believed was justice when Judge Ira S. Gardner fined the dentist \$100 in South Municipal Court.

Despite the ordinance prohibiting the keeping of poultry within the city limits, Dr. Ratta believes a man has the right to take any means at hand to save money and cut out the middleman. His defense was that he kept the poultry pens clean and whitewashed them every month. He apposed every complaint, he said, except putting a muffler on his cackling hens.

Dr. Ratta expressed the belief he is being persecuted and appealed the fine to the Criminal Court where he hopes to have the judge rule the city ordinance against poultry is an infringement of personal liberty and therefore illegal.

back up the police role by financial or armed intervention in order to make things "run in the American fashion."

"It is historically just," Dr. Ratta adds, "for America to believe she has the right to give an American physiognomy to the world. Europe is divided by old and new rancors and differences. Asia is backward in this mechanical civilization. Africa is unawakened. America has the scepter of a world within reach."

The paper believes the United States will submerge Latin civilization of South America, economically if not politically, unless the Latin element is capable of successful resistance. If this submergence comes, it adds, "the fate of the world will be sealed, for at least several centuries."

**AMERICA'S ROLE**  
**THAT OF POLICEMAN**  
ROME, April 27. (AP)—America's new world role is that of a policeman guaranteeing the status quo, says Dr. Ratta, extreme Fascist paper, commenting on the Wilsonian crusade in favor of democracy. Although the American people do not want a program of military expansion, they are willing to

## John McCormack Urges Legion to Visit Ireland

CHICAGO, April 27. (AP)—John McCormack raised his voice today to welcome the American Legion to the Emerald Isle.

The Irish tenor in a statement issued, before leaving for New York to sail for a summer on the "old sod" gave his indorsement to the Legion "visit Ireland" movement, started by Francis J. Killesnoy of Chicago.

Painting a word picture of the Emerald Isle, Mr. McCormack urged the Legionnaires to "come and see this land to which I have sung so many of my songs."

**SHEPARD ESTATE**  
**LEFT TO WIDOW**  
MIAMI (Fla.), April 27. (AP)—The entire estate of the late Elliott F. Shepard, consisting principally of New York property, has been left to his widow. The will has been filed here for probate. No estimate was placed on the estate's valuation. It is said to consist mainly of an inheritance from Elliott F. Shepard, Sr., New York publisher, and a bequest from Commodore Cornelius Vanderbilt.

# NASH

## Announcement!

NASH sales so far this year greatly exceed sales for the same period last year—and 1926 was the greatest year in Nash history. Nash sales in Southern California for a little more than eleven months of 1926 were greater than the total Nash sales in the same territory for the two years of 1924 and 1925 combined. And this is the greatest April Nash has ever had in Southern California!

If you are contemplating the purchase of a car in the Nash field (ranging in price from \$1030 to \$2370 delivered here—26 models to choose from) you cannot afford to forego investigating our policy on trade-ins, made possible by our ability to successfully handle used cars in volume.

**Bring your present car in to us and have us place a valuation upon it.**

Note: Many persons who had previously felt they could not secure genuine motoring satisfaction for less than \$2500 or \$3000 have found in the Nash Advanced Six models a maximum of power performance, beauty of line, comfort, safety and dependability at prices from \$1575 to \$2370 delivered here, without loss of prestige and at a considerable saving.

**We Want You for Our Customer. See Your Nearest Nash Dealer.**

ON NIGHT CLUBS

CHARITY and the night club are alike in one respect, except that the night club covereth about fifty times as many of 'em as charity does.

The night club is like the booting business—it couldn't get along without our best people. It was started by some one who knew that while none of us really believe a poor excuse is better than none at all of us are ready to ride one as far as we can.

Practically all the people you meet at a night club will admit that they belong to our best families. In fact, they have to admit it, for we'd never guess it if they didn't.

A night club also is a place in which we applaud stunts we would boo at a regular show. Some night clubs spring stunt after stunt till we begin to feel stunted; and we can tell by the way other folks take 'em that they've been stunted for years. In the mind.

There are all sorts of night clubs, from the disappointingly proper down to the bad that they are supported only by those of our best people who are strong for Human Interest, Broadmindedness and Earnest Purpose—they must know Life. Which means they, too, are full of curiosity.

If Mother Eve only had thought of that line the dear old Eden estate never might have passed out of the family.

Yes, Palomine, you can get away with murder if you call it war, and with practically anything if you call it a night club.

The Popular Song Writer's Philosophy

There is no longing like that of returning to one's "mamma" south of the Mason-Dixon line.

There is no romance like that of Normandy, Ploesty, Brittany, Arab and Walkie.

June is the one month in the whole calendar.

The only illumination is that of the moon.

The rose is the only flower.

The maiden of one's dream is invariably a creature of enormous attraction.

When one has the "blues," one immediately begins a jazz dance.

When one is in love, one cannot help singing about it.

CHUCKLES from LIFE

His Breathing Spell

"Come into the garden, John, and smell the beautiful roses!"

A clothe-pin tightly clamped on his nose, John stepped out to the lawn.

"Aren't they exquisite?" said his wife, inclining a branch of the rose bush toward him. "Just smell them!"

"No!" he twanged nasally.

"Ah, John—"

"No, no—I'll look at them, but I won't smell 'em!"

"John—do take off that absurd clothe-pin, and just take one tiny—"

At that he clamped the pin even more tightly.

"Don't you realize," he snarled, "that it's after 6 o'clock?"

"But dear," she pleaded, "the breath of the flowers—the joy of drawing into one's nostrils that tender fragrance—"

"Woman," he said sternly, "no. I will not smell your roses!"

Then, clamping another clothe-pin on his nose directly above the first, Official Breath-Smeller for the Henry Ford Factories returned in surly silence to his room.

On Her Own at Last

Marjory (relating schoolroom affairs): Well, in 'thimetic, I don't have to count on my fingers any more.

## POLA KISSED BY PAPA-TO-BE

**P I Z Z I E D O V E R R E P O R T**

"I cannot understand reports published concerning interviews with me," said Daddy M. DiVani. "I never talked to anyone about it except to a newspaper representative who called me at M. M. DiVani's in Poland, who was almost moved to tears earlier in the morning on reading newspaper articles. I was in a serious page was bitterly opposed to having too many motion-picture stars in the family. I am married. My second wife is married."

"Serge is a big boy, able to live his own life and make his own decisions and I am glad to see that he won a charming wife," said the general.

When Daddy M. DiVani had a coughing spell—he is suffering from asthma—and had to return home to his family, he was in a fever.

When he awakened them just in time to escape from beneath the burned roof of the Taylor home before it collapsed.

## JAPAN DIVORCE FIGURES FALL

Fifty Per Cent Cut Reported  
for Past Thirty Years

Late Marriage Declared One  
of Chief Factors

Economic Conditions Also  
Largely Responsible

TOKIO, April 27. (AP)—Late marriages and economic conditions have cut divorcees in the Japanese empire about one-half during the past thirty years, the Home Department of the government estimates.  
During the past year 31,687 divorces were registered and granted by the courts.  
Divorce in Japan is easy in most cases. When a husband and wife mutually agree to disagree, all that is necessary is for the man and woman to go to the proper governmental department and register their separation. They are thereby divorced without any red tape or legal procedure. If there is animosity, this also is usually a matter of agreement. The only cases tried in the courts are those that are contested.  
Thirty years ago there were approximately 100,000 divorce cases registered in Japan. Most of the marriages in those days were between very young persons. The cost of living was low and it required very little money for alimony and other divorce expenses. Today youthful marriages are on the wane and living costs have soared.  
The government is not sure whether the late marriage fashion is good for the country or not. While marriages are still arranged by the families, more and more "love matches" are being reported, but these are not believed to be particularly successful. The Japanese are of the opinion that persons of equal social standing and financial are the best.  
It has been found in recent years that the wife divorces the husband in eight cases out of ten, and returns to her family without seeking any alimony. Lack of children, failure to support the wife properly or general incompatibility are the usual causes. Remarriages are infrequent.

NEW TINKERING  
ON TAX REPEAL

Amendment May Correct  
Allocation Error

Law Just Passed Gives All  
Income to Counties

State Compensation Fund  
Move Dejected

BY C. A. JONES

"Times" Staff Correspondent

SACRAMENTO, April 27. (Exclusive)—Further tinkering with the repeal of the 7 per cent assessment law on intangible securities, which brought down a storm of disapproval on the Young administration, was being considered today by administration leaders and it is probable that additional legislation will be introduced tomorrow.

The lot-assessment law was California's pledge of fairness to holders of foreign securities and it brought millions in wealth to the state. However, a United States Supreme Court decision in a Wisconsin case, held that this was discrimination against national banks and, according to the administration, California faced a loss of \$8,000,000 in state revenues if the 7 per cent law remained on the books. Therefore Gov. Young railroaded the repeal of the law through the Legislature and last week the bill was signed.

DOUBT EXPRESSED

While Atty.-Gen. Webb and A. R. Heron, chairman of the State Board of Control, are satisfied that the law is valid, much doubt has been expressed. The original law provided that the money arising from taxation of the securities was to go to counties, municipalities or districts. The new law, which increased tremendously the taxation level, made no such provision, permitting all the money to go to the counties.

County Counsel Mattson of Los Angeles, held that the law was invalid as it did not follow the provisions of the constitutional amendment which prohibited the enactment of the original law two years ago, and sent Deputy Counsel O'Connor here to tell the administration his opinion.

Amendments, allocating the money in conformity with the Constitution, probably will be introduced tomorrow as additions to bills now being considered by the Legislature. In this manner avoiding the necessity of a three-quarter vote to suspend the Constitution so as to consider new bills during the last week of the session.

SUPPORT OFFERED

"The administration is not concerned with the attacks upon the repeal," said Mr. Heron today. "However, we will lend our support to any measure offered as an attempt to allay the fears of the Los Angeles county officials."

A fine example of practical politics as it is played by professionals was

## LEGISLATIVE BILLS PASSED

SACRAMENTO, April 27. (AP)—The Senate today gave final passage to the following Assembly bills:

Assembly Bill No. 229, McPherson, relieving certain deeds of trust to water front lands given to Vallejo by the State.

Assembly Bill No. 79, Foster, prohibiting buying as well as selling false scales and measures.

Assembly Bill No. 1023, Anderson, providing that counties having no road engineers shall require each Supervisor to keep road and mileage record of all construction and maintenance work in his district.

Assembly Bill No. 1092, Scofield, providing in cases of annexation to cities, county free library service may continue in such areas for the remainder of the fiscal year.

Assembly Bill No. 130, Crittenden, providing for an investigation into the economic problems of agriculture and creating a commission of three with an appropriation of \$10,000.

Assembly Bill No. 600 and \$10, Keaton, providing that delinquent tax-sale money and redemption funds collected on cases prior to 1910 shall apply to veteran welfare aid.

Assembly Bill No. 15, Federal, memorializing Congress for federal aid for construction of a breakwater in Monterey Bay.

Assembly Bill No. 924, Eleanor Miller, providing for allocation of elementary school funds to junior high schools.

Assembly Bill No. 402, Crittenden, defining collection agencies and providing for licensing and regulation of them by the State.

Assembly Bill No. 667, Jones, providing stenographer and typist for Riverside County Superior Court.

Assembly Bill No. 1190, Kelsey, permitting certain quiet title suits against the State.

Assembly Bill No. 1296, Fry, commission bill to measure passed by the Legislature providing that an additional juvenile judge be allocated to San Francisco.

Assembly Bill No. 662, Rochester, given in the Assembly this afternoon when it refused to adopt amendments which would have placed the huge State workmen's compensation fund under the supervision of the Department of Finance instead of the Industrial Accident Commission, as it is at present.

Much opposition has been offered to the present plan of allowing the commission to handle the fund, particularly from doctors, and they are said to have had a preliminary promise from Gov. Young that he would place the fund in the Department of Finance. In his original reorganization scheme he contemplated such a move, but later changed his mind, according to report, due to the pressure from labor unions.

FUND STAYS SAME

When Senator Swing's bill creating a Department of Industrial Relations came up in the Assembly this afternoon, Assemblyman Patterson of Kern county offered an amendment substituting the Department of Finance for the Industrial Accident Commission as the supervising agency for the fund. Then the administration went to work, Assemblyman

McPherson of San Francisco, who was steering the bill, charged up and down the aisles, telling staunch administration men just how they should vote.

Assemblyman Sewell of Whittier moved a call of the House, as many members were absent. This was voted down, thirty-one to thirty-nine. The amendments then were refused twenty-one to thirty-nine and the administration still retains control of the State fund.

HYDRAULIC MINING BILL CALLED OUT

Measure Withdrawn from Finance Committee as Senate Plans for Vote

SACRAMENTO, April 27. (AP)—The Senate today determined that it will vote upon the Clouman bill to provide for resumption of hydraulic mining in California. By a vote of 34 to 12 the upper house today granted a motion of Senator Christian of Alameda to withdraw the measure, Assembly Bill No. 681, from the Finance Committee where Senator Inman of Sacramento, its chairman, had succeeded in preventing a favorable vote by the committee.

The measure was subject of a long debate on the floor today in which opposition was voiced by agricultural interests and Senators from the mountain counties took the stand that the question was a battle between the mountain people and the valley people.

Senator Inman of Sacramento, Rogers of Stockton and Johnson of Monterey, painted graphic word pictures of untold destruction by silt and debris causing floods if the measure were passed and resumption of hydraulic mining permitted.

Senators Christian of Alameda, Allen of Yreka and Ingram of Grass Valley, responded and declared that such fears were unjustified and based upon conclusions of mining methods of half a century ago, and that the Federal government statutes now prevented any such conditions as existed before the close of hydraulic mining forty-three years ago.

The Clouman bill would appropriate \$200,000 to conduct engineering work and purchase damages for the construction with Federal aid of four debris-catching dams that would permit resumption of hydraulic mining without carrying silt down the rivers.

UNION DEATH CASE NOW IN JURY HANDS

Five Possible Verdicts Set Forth in Instructions Given by Court

SAN FRANCISCO, April 27. (Exclusive)—Giving five possible verdicts, Superior Judge Conlan sent the carpenters' murder trial to the jury late this afternoon. The defendants are Gus Maden and George Pease, the former 36 years of age, and the latter 27. They are charged in a grand jury indictment with beating to death MacLellan Campbell, nonunion carpenter, while he was at work on an American-plan construction job during the carpenters' strike last October.

The possible verdicts are murder in the first degree without recommendation, which automatically inflicts the death penalty; murder in the first degree with a recommendation for life imprisonment; murder in the second degree; manslaughter; or not guilty.

"Union men have a right to persuade nonunion men to join their ranks but without violence. No union man has the right to dissuade by violence any man engaged in a lawful occupation."

"If you find that their statements (asserted confessions of participation in strike disorders by the defendants) were not voluntary, you must reject those statements and find from the remaining evidence if the defendants aided and abetted in the assault that resulted in the death of Campbell."

The court then carefully defined conspiracy, felony, manslaughter, murder and assault.

EIGHT BILLS WIN  
YOUNG SUPPORT

Governor Clears Calendar  
of Pressing Measures

Municipal and State Liability  
Insurance Act Vetted

Kosher Meat Legislation Also  
Left Unsigned

SACRAMENTO, April 27. (AP)—Gov. Young today cleared his calendar of all bills which had to be disposed of within ten days to prevent their automatically becoming laws. The remainder of the bills before him do not have to be disposed of until thirty days after the Legislature adjourns. They can be signed or vetoed within that time, and if not disposed of they die automatically.

In clearing up his calendar, the Governor approved eight measures and vetoed two. These latter included the municipal and State liability insurance bill and the kosher meat bill. The bills approved follow:

Assembly Bill No. 381, Little, providing for the joining of several parties as defendants in providing that judgment may be given against one or more as found to be liable according to their respective liabilities.

Assembly Bill No. 582, Little, providing that it shall not be necessary that each defendant be interested as to all of the relief prayed for in order to be joined in a civil action.

Assembly Bill No. 1158, Moses, authorizing reclamation districts that have sold or transferred work or property to the Sacramento and San Joaquin drainage district and have accepted warrants of the district in payment to exchange the warrants at par and interest for any of their own warrants that may be outstanding.

REPORT ON OVERTIME

Assembly Bill No. 15, McDonough, requiring reports by contractors on public construction projects of the overtime worked by their employees.

Assembly Bill No. 844, Jacobson and Peasebaum, increasing the salary of the San Francisco probation officer from \$250 to \$350 per month and one assistant from \$200 to \$275 per month and thirty-one assistants at \$40, four at \$235, twelve at \$310, four at \$185, one at \$175 and one at \$165.

Senate Bill No. 20, Christian, allowing illiterate and helpless voters to pick one or two persons to aid him in marking his ballot.

Senate Bill No. 618, Ray Jones, allowing trustees of mosquito abatement districts to abate nuisances within their districts.

Holding that the need for such insurance should be established before it is permitted, Gov. Young vetoed a Senate measure which would have permitted any district, city, county or county or State, to insure its officers against liability for damages or injury resulting from defective streets or bridges or property.

The bill was introduced by Senator Frank E. Rogers of Stockton.

The Governor held that while the authority would be permissive only, virtually every city and town in the State would obtain the insurance and that the expense to the taxpayer would be very great. Before such a big expense should be permitted he declared the need should be firmly established and the expense involved determined.

UNWISE PRECEDENT

The Governor vetoed the kosher meat bill because it would create an "unwise precedent."

The Governor said that "while I have the greatest respect for the motives which impelled the introduction of the bill I cannot help feeling that its enactment into law would do violence to certain fundamental principles which underlie our constitution and government. In this State, he added, everybody is assured complete religious liberty—I cannot recall any law," he said, "designed to aid the observance or ordinance of one particular religious faith as distinguished from all others and I feel certain that to make such a law would create an unwise precedent."

The measure provided among other things that "anyone who do exposes for sale both kosher and non-kosher food for consumption on the premises, not prepared in accordance with Jewish ritual or not sanctioned by the Hebrew orthodox religious requirements and who fails to display on his window signs in letters at least four inches high 'kosher and non-kosher food served here,' is guilty of a misdemeanor."

ABOLITION OF NOOSE REFUTED

Maj. Tuller Says Bill in Question Aimed to Prevent Freedom Through Mistrial

SACRAMENTO, April 27. (AP)—Abolition of capital punishment in California is not proved in any of the bills now before the Legislature to revise the State's criminal procedure. Maj. Walter Tuller, of the crime commission, which drafted the bills, declared today.

The statement set at rest reports circulated here that a bill just passed by the Assembly which automatically sets life imprisonment as the punishment for first-degree murderers when the jury cannot agree on the penalty, would prevent imposition of the death penalty. The measure is designed, he said, to assure society that first-degree murderers will not be freed because of mistrial.

The bill, Maj. Tuller said, is the outgrowth of the Supreme Court decision reversing the conviction of Floyd Hall, former San Quentin life-term convict, of complicity in the killing of H. J. Litberg, local merchant, while he and Joe "Buck" were creating a reign of terror in this district two years ago. In that case the jury found Hall guilty but failed to agree whether he should be sentenced to death or given life in prison. The trial court held that the death penalty had to be invoked. This ruling was reversed by the Supreme Court and a new trial ordered. Hall later was given two other trials with the same results and the charge subsequently was dismissed.

The new bill, it is signed by the Governor, Tuller said, will do away with the necessity of repeated trials and will not prevent justice from bringing in death penalty verdicts if such verdicts are justified by the testimony.

## JAPAN BUCKS MODERN MODE

TOKIO, April 27. (Exclusive)—Chinese revolutions and Japanese bank failures were forgotten today when the metropolitan police launched a campaign to suppress Bappism, as evidenced by bobbed hair, lipsticks and the demoralizing tendency to follow the dictates of the heart in marriage rather than parental advice.

Throughout the business section police descended, interviewing employers and girls and discovering that many girls seek the acquaintance of male fellow-employees, accompanying them to the theaters and even to the marriage altar, flouting parental opposition. Every girl's clothes were scrutinized and criticized by the police, who noted every case where extravagance was shown.

An official statement by police headquarters following the inspection says:

"The modern office buildings are veritable warring quarters where flirtations are taking place. The tendency to attempt marriage as a result of chance acquaintance outside the home naturally is alarming, so far as the well-being of the nation is concerned."

The president of the largest women's college issued a statement to the press criticizing the girls for following American ideas, in which "too much emphasis is placed on the idea of liberty and equality. While emphasizing the liberty of the present generation the Americans forget the safety of the future generations. It is astonishing how many Japanese are misguided into ideas on marriage as a result of the American example."

Watch Washington Bird—(Advertisement to attempt marriage as a result of chance acquaintance outside the home naturally is alarming, so far as the well-being of the nation is concerned.)

## REWIRE

NEUTRAL ARMY  
NANKING BOUND

Move May be to Attack or  
Join Cantonese

Chiang Issues Last Call for  
Hankow Volunteers

Reports Silent on Progress of  
Southern Force

SHANGHAI, April 27. (P)—Several  
armies of varying size are moving  
today in different sections of China.  
They were supposed to be northern  
troops to the number of 80,000 in  
the neighborhood of Wuhu, up the  
Yangtze River from Nanking, are not  
northerners but contingents of the  
second, fourth, seventh, eighth,  
thirty-seventh and fortieth divi-  
sions of the Nationalist (Canton-  
ese), heretofore regarded as neu-  
tral or uncertain as between the  
Hankow and Nanking governments.  
Most of these troops are proceed-  
ing down the river to Nanking, but  
they are on their way to join or  
attack Chiang Kai-shek, commander  
of the moderate section of the Can-  
tonese.

CHANG ISSUES LAST CALL  
Chiang has issued a last call on  
Hankow, urging those in favor of  
the Nanking government to join him  
without delay, and developments are  
being watched closely by both sides.

Four columns of Nationalists are  
on their way to Canton, which re-  
cently declared its independence of  
both the Hankow and Nanking gov-  
ernments. In this connection advices  
from Kiangsi, Kiangsi Province, say  
that 8000 troops arrived there the last  
two days and more are en route  
from the upper river points. These  
troops are considered favorable to  
Gen. Chiang.

Supporters of Marshal Sun Chuan-  
fang, once overlord of five provinces  
in Central China, are encamped in  
large numbers around Yangchow,  
but the situation there is uncertain.  
Negotiations apparently are contin-  
uing regarding the surrender of Sun  
Chuanfang to Gen. Chiang. In the  
meantime troops are on the move  
from Nanking in the direction of  
Chinkiang, ready to advance across  
the river on Yangchow, if Sun  
Chuanfang fails to surrender.

CENETARY ATTACKED  
Nothing has been heard for two  
days of Gen. Chuan's western army,  
which was reported to be advancing  
in Suichow from Linhaiwan,  
Anhui Province. Considerable  
forces are also on the move in  
Hunan.

The North China Daily News pub-  
lishes a dispatch from Kiangsi  
that the foreign cemetery there has  
been desecrated by Nationalist  
troops. Tombstones were pushed  
over and broken and much marble  
was stolen. From Hankow comes  
word of continued tension and a  
state of agitation owing to the  
radical campaign in that city. A  
great fleet of foreign warships is lying  
off Hankow ready for trouble, which  
is continually being predicted.

Eight-Year-Old  
Boy Again Given  
Jail Sentence

DENVER, April 27. (P)—Johnny  
Sawyer, 8 years of age, and one of  
the greatest curses of the Denver po-  
lice department, is behind the bars  
again after a month of liberty.

Johnny, who escaped from the Col-  
orado Detention Home, is accused of  
robbery. Police say that Johnny,  
with a 6 and a 13-year-old boy as  
accomplices, entered his mother's  
home and took numerous articles.  
The police did not hold the 6-year-  
old boy, who is said to have received  
cents for his part in the affair.

More than two years ago the young-  
ster first came to the attention of  
the local police, when he was arrested  
several times on a charge of stealing  
bicycles and automobile accessories.  
About a year and a half ago he was  
charged with stealing a large auto-  
mobile truck.

DAMAGES ASKED FOR  
VACCINATION ON SHIP

BALTIMORE, April 27. (P)—Paw  
Gray, dancer, today filed suit in Fed-  
eral court here against the Panama-  
Pacific Steamship Company for \$100-  
000 damages, asserting enforced vac-  
cination by physicians of one of the  
ships. She was bound for Panama  
to fulfill an engagement, she declared,  
when ship's doctors forced her to be  
vaccinated—on the thigh—after she  
protested, she being done on her  
arm. Miss Gray charged the opera-  
tion was performed in a "careless and  
reckless manner," obliging her to un-  
dergo hospital treatment, and that  
she is "seriously and permanently  
injured about her body and limbs,  
causing great physical pain and an-  
guish."

CANADIAN IN WARNING  
ON PASSPORT RULES

BUFFALO, April 27. (P)—Mem-  
bers of the Buffalo Kiwanis Club at-  
tending a United States-Canada  
luncheon today were warned by  
George Wilson, Toronto banker and  
civic leader, that "the new passport  
requirements for Canadians working  
in this country must be complied with  
in some manner if the present un-  
fettered and extremely cordial rela-  
tions between the two countries are  
to be uninterrupted."

CO-ED JOKE EXPLAINED  
BY PRINCETON PAPER

PRINCETON (N. J.) April 27. (P)—  
The Daily Princetonian, college news-  
paper, has found it necessary to ex-  
plain editorially that an article in  
its columns on the 1st inst. stating  
that "Nettie Green" had given \$10-  
000,000 to make Princeton conduc-  
tional was an April fool joke. The  
faculty requested the explanation  
after a southerner had charged his  
mind about sending his son to Prin-  
ceton and other college papers com-  
mented seriously.

SPUR TRACK ASKED  
SAN FRANCISCO, April 27. (Ex-  
clusive)—Sycamore Canyon Gravel  
Company of Los Angeles has asked  
the Railroad Commission to compel  
the Pacific Electric Railway to pro-  
vide a spur track from the Cypress-  
avenue line to the plant of the plain-  
tiff at Bonito, Irwindale and Cypress  
avenues.

## FLEET CHIEFS NAMED

Two Vice-Presidents to Have Charge  
of Corporation Divisions

WASHINGTON, April 27. (P)—The  
title of vice-president of the Mer-  
chant Fleet Corporation has been  
given to J. Caldwell Jenkins, for-  
mer director of industrial relations  
and later director of operations for  
the Shipping Board, and to E. A.  
Kelly, who has been director of op-  
erations for the Fleet Corporation.  
Under the reorganization plans of  
President Dalton, Jenkins was given  
the title of vice-president for ad-  
ministration and Kelly became vice-  
president for operations. Their ap-  
pointments have been approved by  
the Shipping Board.

Tempting Providence  
"Houdini" Library Goes to Sing

guests to read the books.—[New York  
Evening Post.

CHICAGO, April 27. (P)—The "Br-  
ver squads" of Chicago's police force  
are panned. Chief of Police Michael  
Hughes announced today, declaring  
he would suppress them with ar-  
med motorcycles bearing bullet-  
proof windshields and suitable or-  
nance to deal with the crooks.

Abandonment of the automobile  
squad, 150 small cars in all, was  
coupled with the announcement that  
Chief Hughes would seek 2000 more  
police to add to the present force  
of 8000 as a means of completing his  
program to clear the city of crooks  
within ninety days.

SHIPPING FIRM ENDS  
PASSENGER SERVICE

NEW YORK, April 27. (P)—With  
the sailing today of the new 22,000-  
ton motorship Asturias for Cherbourg  
and Southampton, the Royal Mail  
Steam Packet Company practically  
terminates its North Atlantic passen-  
ger service between New York and the  
channel ports. Two of the four liners  
that were operating between New  
York and Southampton were re-  
turned several months ago to the Pa-  
cific Steam Navigation Company and  
the two others have been returned  
to the White Star Line.

FAST OCEAN TRIP TO BE TRIED  
ROME, April 27. (P)—In a boat  
eighty-two feet long that moves half  
submerged, Errore Bugatti, automo-  
bile builder, will try to cross the  
Atlantic. He hopes to make it in  
fifty hours. The boat's maximum  
speed is sixty-two miles an hour.

Counterfeiting  
Arrest Result  
of Artistic Urge

SAN FRANCISCO, April 27. (P)—  
Charged with counterfeiting, George  
K. Reid, 30 years of age, a Watson-  
ville salesman with an artistic tem-  
perament which led him to manufac-  
ture "pretty coins," was under arrest  
today by Federal authorities.

"Just for fun," he said, he liked  
to make nickels, dimes and quarters,  
when he explained to Federal Com-  
missioner Francis Krull that he never  
attempted to use them.

Reid was held on default of \$2000  
bail.

"Yes, the mate fell overboard in  
the storm and was never seen again,"  
Old Woman: I suppose he was  
drowned?

Sailor (patiently): No; he sprained  
his ankle.—[London, T. I. I.]

PHILOSOPHERS MEET  
Society Founded by Franklin Cele-  
brates Bicentennial

PHILADELPHIA, April 27. (P)—The  
American Philosophical Society, founded  
by Benjamin Franklin for  
"the advancement of useful knowl-  
edge," celebrates its 200th annual an-  
niversary at its annual meeting here  
today. The society, which originated  
in Franklin's famous "Junto," is the  
oldest organization of the kind in  
America.

On its bicentennial the society is  
starting a campaign for new quarters  
to house its priceless possessions.  
Among these are Thomas Jefferson's  
draft of the Declaration of Inde-  
pendence, the charters of William  
Penn, most of Franklin's original  
papers, Franklin's famous electrical  
machine and a number of portraits.  
Eleven presidents of the United  
States have been members of the  
society.

## SEASONAL INCREASE REPORTED

March Figures of Twelfth Reserve District Higher Than Year Ago

Seasonal increases in industrial output and in volume of trade were generally reported in the Twelfth Reserve District in March and results as a whole compared favorably with the same month of last year. The chief characteristic of the first quarter, according to the monthly statement of business conditions released for today by Isaac B. Newton, chairman of the board and Federal Reserve agent, was the relative stability of business at levels slightly above the trend of recent years.

The average daily volume of check payments, the report shows, was considerably larger in March than in March of last year for the twenty principal cities of the Twelfth District. The relatively low level of 1926 figures rather than the high level of the 1927 figures was responsible, however, for much of the increase, the report states.

Comparative statements of reporting member banks for the three months of this year show some conflict with the testimony of bank officials. Mr. Newton observed in his report. Loans have been considerably larger thus far in 1927 than during the first quarter of 1926, while demand deposits, which ordinarily respond with a fair degree of accuracy to changes in business activity, have only approximated deposits of a year ago.

Seasonal expansion in industrial activity, Mr. Newton observed, was larger than in February. Industrial output, however, had not yet reached the level estimated to have been attained during the corresponding quarter of last year. The volume of transactions during March was also seasonally greater than that transacted in February, and was maintained to have approximated that of a year ago. Total sales of retail stores were larger and smaller in the first quarter of 1927 than in the first quarter of 1926.

Prices, according to the report, continued downward in March, prices of both agricultural and nonagricultural commodities participating in the movement.

## GAIN REPORTED IN EXPORTS OF RAW MATERIALS

WASHINGTON, April 27. (AP)—Increases in the export value of American raw materials were noted today in the Commerce Department's analysis of March foreign trade. United States also increased its exports of manufactured goods, but the total of imports of nearly all classes fell off.

Comparisons between foreign trade items for March, 1927, and March, 1926, follow:

Exports: Raw materials for use in manufacturing, \$107,412,000, against \$82,950,000; raw food, \$19,978,000, against \$18,880,000; foods ready for consumption, \$87,877,000, against \$40,516,000; partly manufactured goods, \$87,972,000, against \$52,527,000; manufactured goods, \$175,492,000, against \$172,204,000.

Imports: Raw materials for use in manufacturing, \$151,255,000, against \$187,775,000; raw food, \$43,061,000, against \$51,108,000; foods ready for consumption, \$46,989,000, against \$40,152,000; partly manufactured goods, \$64,897,000, against \$73,202,000; manufactured goods, \$73,896,000, against \$78,697,000.

## DECREASE SHOWN IN EXPORTS TO MEXICO

DROPPED IN FIRST TWO MONTHS OF YEAR REPORTED AS \$3,500,000

MEXICO CITY, April 27. (Exclusive)—The American Chamber of Commerce in Mexico presents the following figures on commerce between the United States and Mexico:

"During the months of January and February, 1927, Mexico bought goods from the United States amounting to \$19,500,000 American money. The country buying amounted to \$9,500,000 and that of February amounted to \$10,000,000.

This was a fall-off from the purchases of Mexico from the United States for the two months of 1926, which amounted to \$23,000,000 in January and \$12,000,000 in February.

"Major George Wythe, commercial attaché to the United States Embassy in the City of Mexico, has just received the figures of the February trade between the United States and Mexico. Mexico exported to the United States during February \$13,000,000 worth of its products, including oil, sugar, cotton, etc.

The February exports to the United States for Mexico for 1926 amounted to \$15,500,000.

PERCENTAGE figures on exports are as follows:

## DINING CAR SERVICE COSTLY

Meal Service Usually Carried on at Loss; Santa Fe Purchases Enormous Volume of Food

BY HANLEY R. CROWE

One place where the customer gets more than he pays for is in the dining cars of the American railroads. So anxious are the railroads for passenger business and so keen is the competition that it is necessary to consider good business to serve meals at a loss if it is necessary. The passenger demand service on a par with that of the best hotels and the railroads simply bow to the demand.

In the name of service, the Southern Pacific last year served 7,008,420 meals in its dining cars at an average cost of \$1.16. For these meals the passengers paid an average of 92.94 cents a meal, which represented a net loss for each meal to the railroad of 23.95 cents.

## PUBLIC DICTATES

Railroads are not the only enterprises pinched in one department or another because of the rapidly rising standards of service demanded by American consumers. Department stores, banks, steamship companies, theaters and other companies similarly are victims before the whims of the public, but if in the end the business shows a profit, the carriers have not earned the fair return fixed by the Transportation

## NET INCOME OF SANTA FE IN MARCH UP

Gross Operating Revenues of System Also Gain Over Month of Last Year

Net operating income of the Santa Fe system for the month of March, last, amounted to \$2,027,489, as compared with \$3,694,115 for the same month of last year, an increase of \$334,378, according to the company's comparative statement issued yesterday.

Gross operating revenues for the month just past amounted to \$21,116,511, an increase of \$2,186,429 over the gross of \$18,930,072 reported in the month of March, 1926. Operating expenses in March this year totaled \$18,228,433, a gain of \$1,699,544 over the same period last year.

For the three months of this year, gross operating income was \$62,108,406, an increase of \$8,930,908 over the first quarter of 1926, while net operating income jumped \$2,528,019 in the three months to \$12,536,946. Operating expenses for the first quarter were \$43,878,989, against \$38,841,287 for the same period of 1926, a gain of \$5,037,702.

The tax accounts for the three months amounted to \$4,548,726, a gain of \$779,225 over last year. The system now is operating 12,307 miles of road, an increase of 237 miles over last year.

## Golden State Milk Liens on Market Today

Chief interest in new financing announced for this market today is centered in an issue of \$351,500 Golden State Milk Products Company first mortgage 6 per cent serial gold bonds, due serially from 1941 to 1945, and offered by the Anglo-London-Paris Company and Citizens National Company at 99 1/2 and accrued interest, to yield 6.03 per cent.

Offering will also be made of a new issue of \$1,512,000 Wayne county (Michigan) county, township and district 4114 per cent and 4 1/2 per cent highway bonds by Keane, Higgins &amp; Co., Inc. and Lewis &amp; Co., Inc. The bonds mature serially from 1929 to 1937 and are priced to yield from 3.75 to 4.30 per cent.

The Golden State Milk Products Company, a California corporation, engaged in the manufacture and marketing of butter and other milk products, including cheese, cream, dry skim milk and milk sugar, also in the wholesale and retail distribution of cream and whole milk in various cities and localities in California.

## LECTURES ANNOUNCED

Plans for Summer Course at University Grown Out

Summer lectures in practical fields to include investments, labor problems and economics, are announced for the 1927 summer session of the University of Southern California, according to Dr. L. Rogers, dean of the twenty-second annual summer school.

Frank Tracy, director of the department of economics of the University of Southern California, is to come to Los Angeles as visiting professor to head the lectures during vacation months.

Business law, money, credit and banking, accounting, foreign trade, salesmanship and business organization and management are among the commercial courses included in the curriculum.

A record enrollment is anticipated. Last year 4004 summer students from thirty-eight States, eight foreign countries, and 165 California cities attended the summer courses at the Los Angeles city high school district.

## The Clearinghouse

News of Spring Street

Purchasers of A.B.A. certified checks for use abroad will be given this season a 160-page book, "All About Going Abroad," written by Harry Franck, world traveler and author, and published by Brentano's, according to information received yesterday by F. H. Chapman, manager of the foreign department of the Pacific-Southwest Trust and Savings Bank from the Bank's Trust Company of New York.

On Inspection Tour John Earle Jardine, Sr., president of William R. States Company, left Tuesday for a tour of inspection of properties located in Northern California, in which his company is interested. His trip will take him for the first several days to the Peninsula Farms, and he will spend the latter part of his journey looking over the company's interests in the San Joaquin Valley.

To Address Students F. W. Heathcote, junior vice-president of the Pacific-Southwest Trust and Savings Bank, will deliver an address before the students of the ship at the Franklin High School on next Tuesday evening. The invitation was extended by Mrs. E. H. Dickinson, assistant supervisor of salesmanship and advertising of the Los Angeles city high school district.

## Commodity Index at Level of 1922

DEPARTMENT OF AGRICULTURE INDEX OF 30 FARM COMMODITIES, REFLECTING PRICES RECEIVED BY FARMERS MOVEMENT OF NON-AGRICULTURAL PRODUCTS

1918 1919 1920 1921 1922 1923 1924 1925 1926 1927

A sharp drop in nonagricultural commodity prices has shortened margin slightly, but agricultural products continue to dip, and the averages for both groups are at the lowest level since 1922.

## GASOLINE SALES TO EAST HIGHER

Price Cuts Stimulate Buying on Atlantic Coast

Gain in First Sixteen Days of April 61 Per Cent

Exports of Crude Show Sharp Off for Quarter

Shipping of gasoline prices throughout California has stimulated eastern buying in the Los Angeles market, the leading refiners report, and consequently the movement of gasoline from the Los Angeles Harbor to the Atlantic seaboard in the current month has taken a decided jump.

During the first sixteen days of this month, 481,697 barrels of gasoline were shipped from Los Angeles Harbor bound for points on the Atlantic Coast. This compares with a total of 298,680 barrels shipped in the entire month of March, last, and 154,326 barrels in the first sixteen days of April, 1926, an increase of 61 per cent and 213 per cent, respectively.

Gasoline exports from Los Angeles Harbor in the Atlantic domestic trade for the first three months of this year amounted to 1,480,341 barrels as against 1,533,398 barrels in the first quarter of 1926, a decrease of 53,057 barrels. The movement of gasoline in the current month has been sufficient, however, to bring the total exports in the trade for the year to the 16th inst., to 1,562,038 barrels as against 1,707,731 barrels in the same period of 1926, an increase of 254,307 barrels.

On the other hand exports of crude oil from the local port to the Atlantic Coast since the first of this year have been reduced more than 50 per cent because of the increase in charter rates for oil tankers and the low price of crude throughout the midcontinent and eastern fields.

Exports of crude petroleum from the Los Angeles Harbor to the Atlantic domestic trade from the first of this year to the 16th inst., totaled 2,046,455 barrels, as against 4,254,270 barrels shipped in the same period of 1926, a decrease of 2,207,815 barrels.

Midcontinent crude-oil producers can lay down their product on the Atlantic Coast cheaper than California producers can at the present time, oil trade authorities point out. As a result, eastern refiners are taking advantage of this situation and this has resulted in increased shipment of midcontinent crude to the Atlantic seaboard all the way by the various pipe line systems.

## TRADE DRIFT INDEX AT HAND

Quarterly Earnings of More Important Industrial Corporations Show Small Gain Over 1926

BY PAUL WILLARD GARRETT

[Copyright, 1927, by New York Evening Post, Inc.] NEW YORK, April 27.—A gain of 1.0 per cent in corporate earnings for the first quarter of 1927 over the year before is indicated by returns now in. A total of \$168,826,000 was earned in the first three months this year by sixty-nine important industrial concerns as against \$166,867,000 last year.

These actual totals will be altered by later returns, but they include enough of the more important corporations to make them an accurate basis for a study of the 1927 earnings trend. Two giants in the list that reported their earnings only within the last two days swung the total from red into black.

Up to Monday it appeared that industrial earnings for the first quarter of 1927 would be 6.8 per cent under those for a year ago. A substantial advance in earnings reported by the General Motors Corporation on Monday and a moderate gain reported by the Steel Corporation on Tuesday, however, lifted the total to a level 1.0 per cent above that of the first three months of 1926. The first quarter 1927 earnings long have been awaited anxiously by the financial district as a sign of what may be expected for the current year. Fancy about the 1927 margin of profit has led the prophets to a variety of conclusions, but the facts of the matter now are available on which to base a judgment.

Plainly the 1927 improvement in corporate earnings to date reflects improvement, not in industry as a whole, but for certain great leaders. The point is strikingly brought out in comparison of automobile earnings. Seven motor corporations, excluding General Motors, report net income for the first quarter of \$17,819,000, as against \$21,491,000 last year. That represents a 17 per cent

## SOUTH COAST GAS PLANS STOCK ISSUE

SAN FRANCISCO, April 27. (Exclusive).—South Coast Gas Company has applied to the Railroad Commission for a certificate to operate a gas utility in the city of Oceanside, San Diego county, and for authority to issue 1000 shares of capital stock and 850 shares of preferred at \$100 per share to finance construction.

(Continued on Page 15, Column 1)

## DRIFT OF STOCK PRICES ERRATIC

Widespread Irregularity Marks Trading Sessions

Weakness in Oils is Principal Bearish Factor

Steel Earnings Decrease Also Checks Activity

NEW YORK, April 27. (AP)—Frequent shifts of speculative sentiment imparted widespread irregularity to today's stock market. The recovery, which set in yesterday, continued through the early part of today's session, but a reversal of selling pressure against the oils unsettled the general list around mid-day. Supporting orders were quickly forthcoming for the recent leaders and the market steadied, only to sell off again in the last few minutes of trading. Total sales again fell slightly below the 2,000,000 mark.

Failure of the quarterly earnings of the United States Steel Corporation to come up to expectations, combined with reports of a further weakening in demand by the weekly trade review, stimulated bear selling. The Mississippi River floods continued to be a source of uneasiness in some quarters, but, except to dampen speculative enthusiasm for some of the southwestern carriers, they are not believed to have exerted much of a market influence. The credit situation continued satisfactory despite the approach of month-end settlements. The call money rate held steady at 4 per cent.

## Attractive Offerings in the Foreign Field

City of Cordova (Argentine Republic)

7% External Sinking Fund Gold Bonds, due 1957. The only external obligation of the city, a prosperous commercial and financial center, with a population of approximately 200,000. Bonds are directly secured by the pledge of revenues more than sufficient to meet all interest and sinking fund charges.

PRICE MARKET, TO YIELD OVER 7.10%

## Republic of Bolivia

7% External Serial Gold Bonds, due 1958. Bonds are the direct obligation of the Republic and are secured by pledge of certain revenues, including the government royalties from extensive oil lands now being developed by American and other foreign capital. Finances of the country are in healthy condition, and proceeds of this issue will be used for railroad construction.

PRICE 98 1/2 AND INTEREST, TO YIELD ABOUT 7.10%

## State Mortgage Bank of Yugoslavia

Secured 7% Sinking Fund Gold Bonds, due 1957. Bonds are the direct obligation of the bank, which was founded in 1862, and will be secured by pledge of obligations all of which are directly secured by real estate mortgages received by the bank against loans made by it. Payment of principal and interest is guaranteed by the Government of Yugoslavia.

## WOULD A 7% UTILITY PREFERRED INTEREST YOU?

THE remarkable record of dependability established by public utility preferred stocks over the past decade has brought about the steadily increasing demand for this type of security. Dividend rates have promptly reflected this popularity, and the great majority of utility preferreds are now selling on a 6% to 6 1/2% basis.

In the light of this fact, we believe the 7% Cumulative Preferred Stock of the WASHINGTON GAS &amp; ELECTRIC COMPANY offers an unusually attractive investment at present prices. The Company serves directly at retail, electric light and power, or gas to a prosperous and rapidly growing territory in the State of Washington. Net earnings for 1926 applicable to this issue were more than 2.86 times dividend requirements.

Price 98 and dividend, to yield about 7.14%

We shall be pleased to send detailed descriptive circular

## CAUTION RULES ON IRON MARKS

Demand for Most Steel Lines Continues Light

New Orders and Output Still Higher Than 1926

Average of Mill Operations Now at 86 Per Cent

CLEVELAND, April 27. (Exclusive) Restrained contraction continues to mark the demand for most finished steel lines, but this is in conformity to the experience of recent years and is not sufficient to wipe out the slight margin of increase in new business and production over last April. The Iron Trade Review will say tomorrow. Steel prices have been subjected to pressure but, in the main, have held. Pig iron remains quiescent in the absence of spot purchases to round out second-quarter commitments, and quotations largely are unaltered.

The present sensitive market reflects recent tendencies in buying. Consumers are buying so decidedly for current requirements that only the slightest deviation in general business is registered immediately at the mills. The effort to keep capacity engaged is mirrored in intensified selling effort. In the aggregate, the demand for steel is rolling up sufficient tonnage to keep the industry engaged at the comfortable average of 86 per cent, and the outlook for a good second-quarter continues bright.

Flood conditions in the Mississippi basin are having a mixed effect. Recent heavy rains are welcomed in the upper reaches of the river and are seen as the forerunner of better crops and enlarged purchasing power. In the lower portion of the valley, floods have restricted the normal spring buying, but are necessitating the purchase of considerable track material for reconstruction of railroad lines.

The recent curtailment in beehive coke production has not remedied the glutted condition, and this week more cokes are going out. In many districts consumers of cokes are using stocks they accumulated as a

## Business Philosophy

BY WILLIAM FEATHER  
Business success is often due to a hundred causes, some of relative insignificance, and some of major significance. The factor, which you guess is the determining one, may have had as little bearing on the result as singeing the hair or the condition of the scalp.

An unfortunate fact is that a successful man is often the least competent judge of the reasons for his success. Some millionaires would have us believe they succeeded because they acquired the habit of industry by milking cows down on the farm. The real reason may be some peculiar quality of character or mind of which they do not even suspect the existence.

\*\*\*\*\*  
bituminous coal strike defense measure.

Pig iron, like coke, still displays no effect of the strike. The markets of the country are dull with the possible exception of Eastern Pennsylvania. Little steel has been made the past week toward a more stable sheet market. Consumers still drive for low prices and some makers go as far as to bid the market for tonnage. The Chicago sheet market is relatively stronger than at Pittsburgh and in the Mahoning Valley. Full finished sheets hold firmly, despite the failure of the expected automotive industry demand to materialize fully. It is now believed that May schedules of the automotive makers will show considerable improvement. Independent sheet steel executives are meeting in Pittsburgh this week to canvass the situation. Structural shapes dominate the finished steel markets in all districts except Chicago, where bars lead. Activity in plates is less marked in all districts.

The Iron Trade Review composite of fourteen leading iron and steel products again is at \$26.64, the same as a week ago, when it declined from \$26.81, due largely to weakness in unfinished steel.

## THE INVESTOR

National City Company Selects Southern Railway Common for Investment

NEW YORK, April 27.—A short time ago the National City Company, one of the largest underwriting houses in the United States, decided to place certain high-grade common stocks on its investment offering lists. This was a decided departure from its previous practice of offering only bonds and high-grade preferred stocks for investment and is a high tribute to the management of leading American concerns.

One of the primary reasons for the selection of these common stocks for investment by this banking house is that of the Southern Railway Company. It has just prepared an analysis of the properties of that road, in which are listed twelve reasons why it believes its common stock a good investment.

These reasons should not only give the investor a better understanding of the Southern Railway properties but should be helpful to the extent that they may be applied in the selection of other common stocks. The reasons follow in part:

"(1) The South has entered upon a new era of prosperity. Such a motor company ran far ahead of Steel in the matters of earnings in every quarter of 1926, and in the first quarter of this year showed a record of earnings with net income exceeding that of Steel by upward of \$7,000,000 for the period.

"(2) Southern's management is a motor company ran far ahead of Steel in the matters of earnings in every quarter of 1926, and in the first quarter of this year showed a record of earnings with net income exceeding that of Steel by upward of \$7,000,000 for the period.

"(3) Southern's management is a motor company ran far ahead of Steel in the matters of earnings in every quarter of 1926, and in the first quarter of this year showed a record of earnings with net income exceeding that of Steel by upward of \$7,000,000 for the period.

"(4) Southern's management is a motor company ran far ahead of Steel in the matters of earnings in every quarter of 1926, and in the first quarter of this year showed a record of earnings with net income exceeding that of Steel by upward of \$7,000,000 for the period.

"(5) Southern's management is a motor company ran far ahead of Steel in the matters of earnings in every quarter of 1926, and in the first quarter of this year showed a record of earnings with net income exceeding that of Steel by upward of \$7,000,000 for the period.

## TRANSPORT CLUB HOST TO ENVOYS

Fourteen Members of Los Angeles Consular Corps Hear Talk on Brazil

Brazil, with its vast amount of undeveloped resources, offers untold possibilities for trade development with the outside world, and stands ready to co-operate with Southern California trade organizations for the expansion of commerce with that country, said yesterday in addressing a special meeting of the Rail and Water Club at the Alexandria.

Honor guests, in addition to Mr. Sheridan, former assistant Attorney-General of the United States during the Taft administration, and internationally known attorney, included fourteen members of the Los Angeles consular corps, representing fourteen nations of the world.

It is largely by 200,000 square miles that the whole of the United States, Mr. Sheridan said, "yet its population totals but two persons to every square mile. Brazilian hardwood forests are less than one-third the distance from Southern California as the Philippine Islands, yet the bulk of our hardwood lumber comes from these islands. The forests of Brazil are larger than all of Europe and are practically untouched.

The Amazon River, the largest in the world, and more than 3,000 miles in length, is navigable for more than 2,000 miles of its length. It bisects the timber land and agricultural territory, largely undeveloped area. Brazil is the storehouse of the Western Hemisphere for raw materials. Guests at the meeting included:

R. J. Linds, secretary, Los Angeles Consular Corps; James D. Albright, Consul of Bolivia; James M. Sheridan, Vice-Consul of Brazil; J. A. Fisher, Consul of British Empire; Dr. Don Fernando V. Yalson, Consul of Chile; C. R. Roberts, Consul of Costa Rica; Joseph F. Wicks, Consul of Cuba; Don R. A. Hamilton, Consul of Guatemala; R. Uribe Ycaza, Consul of Honduras; F. P. Rios, Vice-Consul of Latvia; F. A. Pennington, Consul of Mexico; James M. Sheridan, Consul of Salvador; R. Wilder, acting Consul of Switzerland; J. D. Wilson, Consul of Uruguay; J. H. McFarland, Consul of Venezuela; and Harry Dunn, Vice-President Los Angeles Transportation Club.

## COTTON MARKET

NEW YORK, April 27. (Exclusive) The cotton market was strong again and fairly active throughout the forenoon today, with prices going up 30 points on May contracts and yesterday's closing and 13 to 15 on later months, thereby recovering most of the setback in the profit-taking reaction of yesterday from Monday's rise. May sold at 15.02 cents; July, 15.39 cents; October, 15.58 cents, and December, 15.68 cents.

Liverpool was strong and higher on heavy continental buying there and an increasing demand from British and continental spinners. The spot price at Liverpool was up 8 English points to 8d a pound for middling with futures closing with a net advance of 3 to 7 points on the day against the decline of 3 to 5 due.

Wire from most southern markets reported a broadening spot demand from both domestic and foreign spinners with not much pressure to sell. The flood situation continues to be seriously regarded throughout the trade for its effect in materially shortening the next crop.

If any further breaks in the levees occur between now and the end of the week trade and market sentiment would be further bullishly influenced.

## MARKET FLASHES

NEW YORK, April 27. (AP)—The stock market today was characterized by a general decline in prices, with the Dow Jones industrial average closing at 229. The market was affected by a combination of factors, including a decline in foreign exchange rates and a general loss of confidence in the market.

Yearly total to date, 258; total to same date last year, 475. Deepening or retarding jobs this week numbered seventeen, as compared with eleven during the previous week. Total to date this year, 273; total to same date last year, 500.

## SHIP AND CREW HELD

Japanese Arrested for Breaching Philippine Customs Rules

MANILA, April 27. (AP)—A Japanese launch and its crew of seven at Babuyan Island, north of Luzon, were taken to Aparri, northern Luzon, and confined in jail charged with violating the Philippine customs regulations.

Although the seizure took place last Saturday, it was not made known until today. Japanese have frequently been reported to be poaching in the Philippine waters to the north, fishing and cutting timber. The customs collector recently requested the aid of the constabulary in enforcing regulations, which require a license for fishing and timber cutting.

## BANKRUPTCY PETITIONS

Bankruptcy petitions were filed today in the following cases: [List of cases]

## NEW YORK CURB STOCKS

NEW YORK, April 27. (AP)—The New York curb market today was characterized by a general decline in prices, with the New York curb index closing at 100. The market was affected by a combination of factors, including a decline in foreign exchange rates and a general loss of confidence in the market.

Despite the fact that last year's earnings were less than \$3 a share, American Cellulose common stock rose 20 points to a record high of \$180 1/2. The rise was based on expectations of substantially increased earnings through development of a new line of products from cellulose.

Oils continued to reflect the unsettled condition of the industry, which has been intensified of late by a further increase in crude output and a corresponding decline in demand for refined products.

Goodbye, the railroad 3 points but less part of its gain despite the fact that it had an early increase in the price and had been advanced in some speculative quarters.

Domestic Stores was run up 4 points to a new top of \$100 1/2. The rise was based on expectations of substantially increased earnings through development of a new line of products from cellulose.

Public utilities were well supported on the strength of a large current dividend payment, with the New York Public Service rising 10 points to \$100 1/2. The rise was based on expectations of substantially increased earnings through development of a new line of products from cellulose.

By climbing nearly 3 points to a new top of \$100 1/2, the New York Public Service was well supported on the strength of a large current dividend payment, with the New York Public Service rising 10 points to \$100 1/2. The rise was based on expectations of substantially increased earnings through development of a new line of products from cellulose.

Electric, the department store and the New York Public Service were well supported on the strength of a large current dividend payment, with the New York Public Service rising 10 points to \$100 1/2. The rise was based on expectations of substantially increased earnings through development of a new line of products from cellulose.

Both low and high when seen at the high, the New York Public Service was well supported on the strength of a large current dividend payment, with the New York Public Service rising 10 points to \$100 1/2. The rise was based on expectations of substantially increased earnings through development of a new line of products from cellulose.

## UTILITIES FORM GREAT MERGER

Pacific Gas and Electric Buys Three Companies

Total Assets Now Estimated at \$400,000,000

Concerns Were Property of H. M. Byllesby & Co.

SAN FRANCISCO, April 27. (Exclusive)—Negotiations were completed today by which the Pacific Gas and Electric Company acquires additional properties worth \$400,000,000 and becomes a public utility with an aggregate value of approximately \$400,000,000. It is believed to have become the largest organization of its kind in the United States by the transaction.

The deal provides for the purchase by Pacific Gas and Electric of the Western States Gas and Electric Company, Coast Valleys Gas and Electric Company and Sierra and San Francisco Power Company, all operating in Northern California. All have been controlled by H. M. Byllesby & Co.

Announcement of the combine was made this afternoon by Wigginton E. Cred, president of the Pacific Gas and Electric Company, who said the merger had been ratified by the directors.

Terms were not announced, but the statement that J. J. O'Brien, president of H. M. Byllesby & Co., will be added to the directorate of Pacific Gas and Electric is taken as an indication that the Byllesby interests are taking over a large slice of stock in the expanded organization in exchange for operating properties involved in the deal.

# Slaying of Cowboy Actor Goes Before Grand Jury Today

## WIDOW SLATED FOR QUIZ CALL

Others at Fatal Party Due for Questioning Also

Condition of Five in Custody Hinders Investigation

Coroner Plans Inquiry Into Death for Tomorrow

The slaying of Tom Kerrick, one-time Arizona deputy sheriff and for some years an extra in western cinema productions, at the end of an all-night party in his home yesterday, will be laid before a special session of the grand jury at 10 a. m. today, Dep. Dist. Atty. Eagan announced last night. Mrs. Sarah Kerrick, widow of the slain man, now held on a police charge of murder, will be hailed before the grand jury. With her will go Joe Hunt, another extra, held on suspicion of murder. Material witnesses are Henry Isbell and Anita Davis, slain to be Isbell's wife, also extra, and Miss Iris Burns, who described herself as "a secretary."

Capt. Slaughter of Hollywood police said the investigation yesterday was considerably handicapped because the five, who admittedly were participants in the party, were still hardly sober enough to be questioned. Liquor flowed freely at the party, which was conducted in the Kerrick home, 843 1/2 Hayworth street. The guests are asserted to have admitted that there was quarreling among them.

**ACCIDENT ASSERTED**  
Mrs. Kerrick confessed, Capt. Slaughter said, that the 22-caliber bullet that pierced Kerrick's chest came from Hunt's automatic pistol in her hand but declared the discharge was accidental while she, her husband and "some of the others" were scuffling in a quarrel. Anita Davis, asserted Slaughter, said that Mrs. Kerrick fired the fatal shot. Some of the trouble centered around Miss Burns and the men, according to the police.

Coroner Nance will conduct an inquiry into the killing tomorrow at 10:30 a. m. Statements made to police, Capt. Slaughter said, disclosed that the Kerricks called for the Isbells at the latter's home in Lankershim, 5124 1-3 Tujunga street. Tuesday night and later called for Miss Burns, who gave her address as 5143 Fountain avenue, and started a party at the Kerrick home. Hunt, recently returned from Arizona, was staying at the Kerricks.

**CAUSE OF ROW**  
According to the police, there was some quarreling between the Kerricks because of jealousy of the wife over the husband and at one time she engaged in a fight with Miss Burns.

The Kerricks came here some years ago from the vicinity of Florence, Ariz. Hunt also was for a time in those parts. Miss Burns yielded little information about herself. She is the youngest of the party. Kerrick was said to be 35 years of age. Police were called to the scene by neighbors. Two shots were reported heard. One bullet struck Kerrick and he was lying dead in a pool of blood when officers arrived. In his pocket were Miss Burns's purse, bank book and some money, police said. Hunt's empty purse was found in the bathroom. He said he had \$210 in it. The pistol lay with two empty shells under a breakfast nook table. Mrs. Kerrick and Anita Davis were found at the Kerrick place, Hunt in an automobile in front of it and Miss Burns in her apartment-house. Isbell turned up at Hollywood station while police were searching for him. Joe Kerrick, 3703 Elm street, Lankershim, is a brother of the slain man.

## All-Night Revel Tragedy Principals

TOM KERRICK, MRS. SARAH KERRICK, JOE HUNT

IRIS BURNS, HENRY ISBELL, ANITA DAVIS

## Police Officer Serving Term Gets Dismissal

Berg, Elmer L. Betterson, now serving a ninety-day sentence in the County Jail for the asserted sale of a police record, was formally ordered dismissed at a special meeting of the Police Commission yesterday. The commission also revoked the license of Antonio Masadino to operate the Crystal Cafe at 110 1/2 South Spring street on the grounds that the place has been conducted improperly. It was charged that nearly a dozen arrests on Wright Act charges have been made there recently.

## CLUB OPEN SATURDAY

Concordia Festivities Scheduled for Two or More Nights

The new Concordia Club at 360 South Westlake avenue, is having a gala opening Saturday and Sunday nights, and for as many nights thereafter as will be necessary to accommodate the members, families and friends.

Ben M. Goldman is president of Concordia, which is the only Hebrew club in the city. Dr. J. Z. Gantz is first vice-president; Charles Brown, second vice-president; Albert Lane, treasurer; J. C. Cummins, secretary. The board of governors includes George Appel, W. W. Bearman, L. A. Bloom, Charles Brown, Emil Brown, Henry Gilbert, Saul Brown, A. Rumburg, I. B. Benjamin, Joseph Shapiro, Albert Lane, Robert Laykin, Harry Genser, Leach Cross, Arthur Bard, Maurice Sacks, Rudolph Rosenberg, H. D. Black, J. C. Cummins, Benjamin M. Goldman, M. Segaloff, Joseph Schlyen, Dave Miller, I. Patis and Dr. J. Z. Gantz. Leo Forstner will conduct the dance orchestra on the opening night and has written a special song for the occasion. George J. Hartman is chairman of the dedication committee, and Dr. Gantz chairman of the entertainment committee.

## MAYOR VETOES ZONE MEASURE

(Continued from First Page)

one of the main entrances to the city from the northeast. It passes through a district which is being built up with beautiful homes. It should be developed as a continuously attractive residential boulevard throughout the entire distance from Riverside Drive to Western avenue. So maintained, and bordered by beautiful shade trees, it would become one of the most attractive streets in the city.

## DAM PARADE ROUTE GIVEN

(Continued from First Page)

chambers of commerce in the metropolitan area. 225 and business houses. When such locations for business purposes are once allowed the inevitable tendency is for them to expand, so that it is only a matter of time until the character of the street so invaded is entirely changed. For the reasons stated I do not approve of the proposed ordinance.

## Harbor Battles Result in Two Skull Fractures

By a "Times" Staff Correspondent  
LONG BEACH, April 27.—With his nose partly bitten off and suffering from a skull fracture, Fred Atkinson, a resident of Mohegan Camp near here, is in the Community Hospital seriously injured as a result of a fight with a neighbor, A. J. Mankins.

Atkinson, according to police, went to a beating at the beach on Sunday afternoon. He was seen by a neighbor, who said that he had seen Atkinson being beaten. Atkinson was taken to the hospital where he was found with a skull fracture and a fractured jaw. He is now in a serious condition.

## NEW WIDENING PLAN

Use of Half Night of Way Land on Boulevard Urged  
Resolutions adopted by the board of directors of the Affiliated Improvement Association recommending that, instead of widening Glendale Boulevard by taking from the abutting property, as much land as possible be taken from each side of the street railway's right of way, were forwarded to the City Council yesterday.

## Victim Held as Bandit Suspect Given Freedom

From victim to robbery suspect and back to victim again was the little role played yesterday by Percy Goin, 21 years of age, of 242 West One Hundred and Ninth street. Two young bandits Tuesday night held up Dr. Owen Meredith, auto club physician, at Fifty-ninth street and West Boulevard, and took his car. Later they held up Goin, a girl in West One Hundred and Twelfth street, and still later abandoned the car.

## Woman Loses Suit Against Acting School

Municipal Judge Hardy yesterday ruled in favor of Robert Major, head of the Major School of Acting, in an action for \$250 brought by Mrs. Stella Essex.

Mrs. Essex asserted that Major had failed to carry out a contract to train her two children, Stella, 12 years of age, and Wray, 14, and to provide them with a suitable education. Judge Hardy based his decision on the ground that the children had not completed the period of their training.

## I See by Today's 'Times' Want Ads—

That reward is offered for return of headed bag containing \$50 and papers, lost near Avenue 30.

That reliable girl is wanted for general housework and to assist with care of children.

That man with nineteen years experience in Los Angeles wants job as chauffeur. Excellent character references.

That \$75 down will buy late 1923 model Dodge touring car.

That experienced furniture salesman is wanted for outside work. Drawing account and liberal commission.

## PSYCHOLOGIST WILL OPEN CLINIC HERE

(Continued from First Page)

Mrs. Alma King

The lecture system in colleges was severely criticized by W. W. Campbell, president of the University of California at Berkeley. The most perfect curriculum in the world will fall of its purpose if the professors do too much of the talking in the lecture room. Too much of the matter is put in the laboratory, and the students merely listen and "take it easy." A curriculum of only mediocre matter will serve as a successful skeleton of which to construct a fine educational body if the students work earnestly and thoughtfully, under the wise guidance of their preceptors. The professional pumping of cold facts and abstract principles into so-called students has never yet made an educated man nor an educated woman, and it never will. It is just facts that people want they should not go to college. Many books crowded full of facts have been published to meet their needs.

## CONSULTANT ON BEHAVIOR VISITS HERE

Mrs. Alma King Points Out Parents' Need in Rearing Children

Mrs. Alma King, consulting psychologist of the Hebrew Orphan Asylum of New York, came to Los Angeles the first of the year on her first vacation in four years and then it so well that she has decided to transfer her activities to the Pacific Coast. "I should like very much to see a clinic established here like the Cornell Clinic in New York," she said. "There the people who come pay \$1 or \$1.50 a visit and the best physicians available in each specialty attend them."

"Now my particular interest is in behavior situations. The great mass of people don't realize that they need help with their children in this respect just as much as in a medical way. They wouldn't think of rearing their children without a doctor's advice now and then, and in just the same way they need a psychologist's counsel concerning the mental hygiene of their children."

## Miss Mehaffey Will Marry but 'He's' Secret

Is Blanche Mehaffey, screen actress, engaged? And if so, to whom? The young actress, who was a few years ago a "vamps" baby star, yesterday dubiously admitted that she had a story of her engagement, presented to newspapers by a press agent earlier in the day. When her attention was called to the fact that the press agent's story failed to name the lucky man, however, she refused to supply the omission.

## Democracy of Service Theme of Dr. Dexter

"Leaders of thought in this country have come to the conclusion that American democracy must be a democracy of liberty and service, rather than one of equality," said Dr. Walter P. Dexter, president of Whitier College, in an address yesterday at the City Club.

The philosophy of freedom includes the ideal of service to others, for without such an ideal liberty becomes license and selfishness destroys the foundation of individual and national happiness and prosperity," said Dr. Dexter.

## BOULEVARD PAVING PLANS COMPLETED

Plans for paving Long Beach Boulevard to a width of seventy feet for a stretch of four miles south of Compton, have been completed, Supervisor Beatty announced yesterday. They call for nine inches of concrete, sidewalks, curbs and gutters and the estimated cost is \$454,000.

## REVISOR FACES DOCTORS' TOPIC

INSIDE CRITICISM  
The lecture system in colleges was severely criticized by W. W. Campbell, president of the University of California at Berkeley. The most perfect curriculum in the world will fall of its purpose if the professors do too much of the talking in the lecture room. Too much of the matter is put in the laboratory, and the students merely listen and "take it easy." A curriculum of only mediocre matter will serve as a successful skeleton of which to construct a fine educational body if the students work earnestly and thoughtfully, under the wise guidance of their preceptors. The professional pumping of cold facts and abstract principles into so-called students has never yet made an educated man nor an educated woman, and it never will. It is just facts that people want they should not go to college. Many books crowded full of facts have been published to meet their needs.

GOOD EXAMPLE BAD  
Dr. Howard A. Kelly of Baltimore, Md., was to have been the principal speaker at the general session yesterday but was unable to be present because of illness in his family and Chester H. Rowell, formerly editor of the Fresno Republican, spoke in his place.

Dr. Kelly took issue with Dr. Stuart McGuire of the University of Virginia who told the convention delegates Tuesday that the teaching of sex hygiene in public schools was an evil which should be corrected. Mr. Rowell said that more smutty stories will be heard in the presence of a group of lawyers than in a group of doctors. By proper teaching of sex hygiene in the schools young people can be brought to understand these subjects so that there will be less mystery about the subject, he said. He said he has no fear of women losing their prudery through listening to intelligent discussion of subjects intimately connected with sex hygiene.

Dr. J. Ross Moore of Los Angeles discussed the evolution of thought from a stimulus in some one of the senses to motor action in the muscles.

Dr. Henry J. Gernsleben of Cleveland, O., one of the most noted experts on pediatrics in the country, spoke on the effect of human milk in prevention and elimination of rickets.

RARE DISEASE TOPIC OF ANGELOUS SPEAKER  
Dr. H. F. Jacobson, medical director of the Los Angeles Skin and Cancer Hospital, read a paper before the association yesterday on coccidioidomycosis, a rare disease sometimes known as the "California disease," though it was discovered in Brazil in 1907 and occurs all over the three Americas. It is usually wrongly diagnosed as a form of tuberculosis, Dr. Jacobson said, and frequently is mortal.

Dr. Jacobson gave the history of two cases which he treated at the Los Angeles General Hospital and a third which recently came under his care at the institution. The treatment in the two cases was successful and the third apparently is improving, Dr. Jacobson said. The disease is a systemic disease, he said, caused by a fungus, the coccidioides immitis.

NEW ELECTROTHERAPY MACHINE ON EXHIBIT  
The electrotherapy exhibits at the annual session of the California Medical Association at the Biltmore, is according to Dr. James B. Dean, Los Angeles gynecologist, the most complete of any heretofore shown. The most recent discovery in electrotherapy is that of the diathermy, a machine used to considerable extent in medical and surgical conditions. With the electric current passing through the machine through tissue, heat is produced on the surface of tissue and deep down as well as a result of the resistance the electric current encounters.

The diathermy machine is a small, portable, and easily operated machine. The most recent discovery in electrotherapy is that of the diathermy, a machine used to considerable extent in medical and surgical conditions. With the electric current passing through the machine through tissue, heat is produced on the surface of tissue and deep down as well as a result of the resistance the electric current encounters.

The diathermy machine is a small, portable, and easily operated machine. The most recent discovery in electrotherapy is that of the diathermy, a machine used to considerable extent in medical and surgical conditions. With the electric current passing through the machine through tissue, heat is produced on the surface of tissue and deep down as well as a result of the resistance the electric current encounters.

**MEMBER OF THE ASSOCIATED PRESS**  
 The Associated Press is exclusively entitled to the use for republication of all news and information contained in this paper and also all local news published here within.

The Times aims at all times to be accurate in every published statement of fact. Readers who discover any important inaccuracy of statement will confer a favor by notifying the Editor or the Editor-in-Chief of the Editorial Department to the effect:

*Bad news, if they exist, should be repeated as soon as possible; still, while they continue in force, for the sake of example they should be religiously observed.*

—Abraham Lincoln

**A FEW SHARES**  
 Speaking of industrial stocks the plowshare is still worthy of diligent attention.

**THE YOUNG IDEA**  
 Not only are the American colleges crowded, but it is said that there are nearly 5000 American students in French institutions.

**THE GUNNE BOYS**  
 Los Angeles is generally depicted as a beautiful young woman, but up Sacramento way they can't get any other idea than that Los Angeles is Santa Claus.

**THE HIGH FLYERS**  
 New York is passing a law to punish aviators who fly while intoxicated. This seems superfluous. They are generally thoroughly disciplined by the time the corner reaches the scene.

**CARE OF HUSBANDS**  
 A woman writing a series of articles on the care and keep of a husband says that the wife should not scold him or argue with him—just tell him and then see that he does it. It sounds distressingly simple and yet it doesn't always work.

**THE CRIME PROBLEM**  
 It costs something over \$300 a year for the care and keep of a prisoner in the average American penitentiary. After all that is the cheapest way of solving the crime problem. The crooks cost the country a good deal more than that while they are at large.

**DAMON DISCOVERIES**  
 The South American diamond mines were discovered just sixty years ago and the sparklers found the first year have not felt the waste of time. They are worth about five times as much now as they were when brought to light. That is almost as good as compound interest.

**SOMETHING ON FOOT**  
 In an eastern city the traffic commission says he cannot waste time and attention on pedestrians unless they are hurt at regular crossings. There they are to be protected to the limit, but if they butt into the highways at irregular points they will have to take their chances. The new theory is that the foot passenger has no business save in channels that are marked for his movements. The lawbreaker doesn't even have the protection of the game laws. All are open seasons for his slaughter.

**FREEDOM OF THE AIR**  
 The silliness and selfishness of union leaders are indicated by their efforts to bring about union domination of the radio. If they should chance to have their way, for instance, none but union musicians would be suffered to broadcast the nation's harmonies. The efforts to unionize the establishment of the radio industry is the organization of a monopoly of the country's broadcasting.

**LAKE FOR BURGARS**  
 The Michigan Legislature prescribes the lash as auxiliary punishment for armed burglars. The law as passed provides that while such criminals are in prison they are from time to time to receive a real flogging with leather thongs across the bare back. This may seem to be harking back to the Middle Ages, but it is explained in mitigation that the seasoned criminal dreads the whip more than any other punishment that can possibly be provided. Certainly an armed burglar deserves little mercy or consideration at the hands of civilization. If the whipping post, the stocks or the ducking stool can check the criminal advance many will welcome their revival.

**THE TEA PARTY**  
 The Solid South is making sturdy efforts to substitute cassia for tea and coffee. At a recent industrial fair in Charleston, S. C., cassia was served—either fed or sold—to thousands of pleased visitors every day. This luring drink is brewed from the dried leaves of the yaupon or cassia berry of the Carolinas. This is a shrub of the holly family and the leaves and berries are both rich in caffeine—the gentle stimulant whose properties make for the popularity of both tea and coffee. The Indians of Florida were for two centuries accustomed to making a drink from the yaupon, but there was originally a bitter taste which modern chemistry has corrected. An official of the Department of Agriculture unhesitatingly asserts that the medium-priced cassia is superior to the medium-priced grades of tea and should make just as refreshing a beverage. If there is ever another tea party in Boston the natives may turn to this notable specimen of the holly family for their cheer.

**WORKING AND VOTING**  
 Interest in next Tuesday's municipal primary is not proportionate to its importance to Los Angeles. With the day of voting close at hand thousands of good citizens have taken little note of the outstanding issues, because they happen to lack interest in the election in their own districts. When Councilmen were elected at large, and their elections depended upon the action of all the voters widespread attention was given to city elections because every voter realized that his vote had a direct bearing upon the personnel of the Council as a whole, but since the city has been partitioned into fifteen districts the special interest of each voter appears to have been likewise reduced to one-fifteenth. This is one of the numerous disadvantages of the ward system.

Since the new arrangement has lightened the labors of political manipulators who seek to control city affairs the purely professional politicians' activities have greatly increased, while the election-day zeal of hard-working citizens has fallen off. Those genuinely solicitous for the proper administration of city affairs are urging voters in every district of the city to interest themselves in their district candidates, for they are responsible for the selection of a man fit to serve on the board of directors of the largest corporation west of Chicago.

If the district voters show a personal interest in the election commensurate with their responsibility to the rest of the voters in their own district and voters in other districts, the result will be representative and satisfactory, but with machine politicians working to get out the vote for their personal candidates and the really representative voters overlooking the issues or failing to vote altogether the chances of having a group of men in office capable of administering the big affairs of a great metropolis are thin and precarious.

Every voter, therefore, should do his utmost in the remaining days before election to insure the choice of a Councilman in his district fit to represent his district and competent to serve the city. A sense of shame in the event voters let a district election go by default, and send to the Council a man unfit to serve, either through personal incompetence or because of subversive or otherwise contaminated political associations, will not suffice to aid the voters who have attended to their duty and served in office in other districts men whose places will be valuable and unseemly.

Indifference on the part of the representative voters of a single district may muddy the complexion of the City Council until the next election. On the other hand, honest and patriotic effort in any one district may result in the election of the one man who can make a majority for better government.

Whether a citizen's chief interest lies in his district or in the whole city the one way to protect that interest is to work and vote for proper representation from his district at the City Hall.

**FLOOD BENEFIT**  
 Will Rogers voiced a well-demonstrated fact when he said, "Actors will help in every town to give shows and raise money for the aid of those in distress."

No catastrophe in recent years has so touched the heart of America as that which is devastating great areas in Arkansas and Mississippi. Homes swept away, families separated, loved ones killed or maimed, pestilence threatening, poverty and distress behind each crumbling levee.

Help is needed imperatively, immediately and in large measure. To this end the motion-picture industry, co-operating with legitimate theaters and the Theater Managers' Association, is arranging a benefit performance to be given at the Metropolitan Theater next Saturday night beginning at 11:30, the entire proceeds to be turned over to the relief fund.

There is no question of sufficiency of talent. Every professional entertainer in Los Angeles is ready to go on. In no other city in the world can so fine an entertainment be staged. Behind a great industry beats a pity-filled heart backed by the will to serve and making the overplayed philanthropies of a few unimportant individuals seem more than ordinarily tawdry.

There should be no vacant chairs at the benefit. The blessed spirit of service may well strike a vibrant, responsive note sounded by a public eager to receive the gift of the players and to add thereby many thousands of dollars to the Red Cross flood relief fund.

**BUSINESS ON THE BLINK?**  
 Shoemakers met recently in solemn convocation and discovered that men are now buying but two pairs of shoes where formerly they bought three. They blamed the motor car. However, if an assembly of the men were to investigate it would likely find that their trade had prospered proportionately.

Since woman has taken the slogan, "Be brief," to heart petticoats can now be purchased in antique shops. On the other hand, it is but fair to admit that the woman's shoe and hosiery business has stepped up.

Stationers are dispirited because women are not writing long letters, as they once did. Time appears to be too short and they are telling it with telephones. What is lost by the stationers is collected many times over by the telephone company.

The ice man is shivering in his boots. It is not from cold, but from fear that electric refrigerators will supplant the old-fashioned chunk of ice. Every kitchen will have its own freezing apparatus.

Prophets are not the only ones to suffer from a sickle public. Clothiers as well as politicians find the mob is unstable. Readjustments are essential to keep customers as well as congregations. Text books are not the only works out of date in a year.

Hatters as well as philosophers need to alter their styles and bring out new models annually to catch the excitable age. Heavy seems to be on the side of the alert. Updegraff calls it the "new American tempo" in business.

Troleys must surrender to rubber tires. Phonographs must yield to radio. A new and better finish is demanded—from Duco to lipstick. "Fashion is a wayward hussy," says Ernest Elmo Calkins in The Atlantic.

Skirtbinders are as passive as the implements of the Stone Age. Business is not on the blink—the blinking is caused by new ideas striking the retina.

(Copyright, 1927, by Public Ledger, Inc.)

**SPRING STYLES**  
 Bright thinkers of the masculine sex have always contended that lovely woman was always deficient in a sense of humor. The instances wherein those of the female gender displayed a funny bump were supposed to be the exceptions that merely proved the rule. This contention has always been stoutly refuted by feminists, along with the statement that they had no sense of logic, and other contemptuous imitations of the weak but determined sex.

We have always stood up for the women, but the new spring fashions force one to believe that the funny bone was omitted from the make-up of Eve and her descendants. Anything more humorous than a jaunt through a fashionable shop or a glimpse down Seventh street could scarcely be imagined. For the poor cows have been snatched from the dairy to an untimely death, so that milder may bedeck her form with a cowhide coat. A glimpse in a tearoom convinces one that he is looking in the barn back on the old farm. So many broods, expanding backs glistening with cowskin, give a truly rural effect to our metropolises.

The ghosts of departed Guernseys, Jerseys, Herefords and Holsteins must look on with astonishment at the ensemble. Holstein seems to be the most popular and expensive; doubtless because it produces the most laughable effect. A hefty dame perambulating through the streets in her white skin coat dappled with black looks for all the world like a huge Holstein that has inadvertently shed hoofs and horns. It has taken all of bossy's earthly garment to make a garment for her ample form, and the result makes her look twice her true size. Gazing at her and the owners of other bovine coats one thinks of the immortal Scotch bard's lines, "Oh, wad some power the gillie gie us to see ourselves as others see us." No, women have no sense of humor or they would have stopped at the pony skin coats, fashionable last winter. It was a short but regrettable step from Dobbin to Bossy. Who knows, perhaps the barnyard pig will be the next called upon to donate his coat to bedeck milder's surprise form?

**PORK BARREL**  
 Chicago has many big and varied business interests. Its meat-packing corporations are the greatest on the globe. Its railways are vast and as expansive as the continent. Yet its biggest business is politics.

All the people have a financial interest in it. Money is made and employed and more money is handled in the business of running Chicago than are controlled by any other concern. And Chicago is a type of all American cities.

The business man cuts the coat of his firm at every angle, plugs up leaks and watches his bills like a hawk. But when it comes to his tax dollar he is singularly blind and deaf. So says Frank R. Kent in Nation's Business.

The tax dollar is about the only dollar for which the ordinary keen business man does not get a full return. He has a superstitious awe for city, county, State and Federal taxes. He will pay good money out on taxes on income, real estate, inheritance, automobiles, tangibles and intangibles without comment or even prayer.

He is told that city, county, State and national governments are extravagant, inefficient, are needing places for crooks and hangers-on; but outside of growling like a bull terrier to his neighbor, he does nothing.

Four years ago a Baltimore business man, William J. Casey, vice-president of the Continental Trust Company, found his firm unable to make his huge business block pay. It was filled with tenants, but squirm and twist as it would, the company could not realize more than 3 per cent on its investment.

He scrutinized every dollar, poked into all the corners where there might be a leak, only to return baffled. Finally he came to the tax dollar. Possibly having handled money so much, it did not seem any more sacred than any other dollar.

He found some things that aroused his curiosity. Taking a dozen other big corporations into his confidence he suggested

that a commission be formed and their regularly paid experts be put on the trail of the tax dollar and they also be instructed to bring in findings for action.

These specialists soon found where overlapping departments could be merged or even completely wiped out. An audit system that would be not only foolproof but also thieftproof was proposed.

They managed to secure the sympathy of the Mayor and results began to come quickly. The Baltimore city tax rate dropped materially in the last three years. And it was all accomplished practically without cost to the city.

The strength of a political machine is found to be in exact ratio to the inertia of the people. It might be noted also that the primaries are primary in more senses than one. The primaries look innocent and feeble enough where but a light vote is registered, but here are the sources of political power.

Why are we as a business people bores about our biggest business?

**HELPING THE FARMER**  
 During the Congressional recess Senator McNary is working out another relief bill that will be able to command the support of the President and be free from most of the serious complications surrounding the measure which met with an executive veto. President Coolidge is more anxious than most men to smooth the path of the farmer, but he wants the relief to be practical rather than political. He is not to be stampeded from that position.

**LOST IDEALS**  
 Every now and then some college student will spring a thesis upon the importance of our giving attention to political ideals, but the average man is developing the ingrown belief that there is no such animal. Most politicians cannot identify an ideal long enough to have its name engraved on their business cards.

**A MISTAKE**  
 By James J. Montague  
 With an ear unattuned to the rhythmic beat of an orchestra's musical throes, With a couple of awkward and indolent feet, And a violent love of repose, I kept out of ballrooms for most of my life. Viewed the foolish fantastic as a— And often observed to the dear little wife That I never would learn how to dance. But this notion, my doctor declared was unsound. He said I would lessen my girth And strengthen my muscles by dancing around.

And lengthen my years on this earth; He told me the sluggish existence I led Would breed in me ailments untold, And unless I learned dancing I'd likely be dead Before I was fifty years old.

So I learned all the steps that instructors can teach Jazzed around three or four times a week, My feet keeping time to the saxophone's screech And the oboe's unmusical squeak; I often would dance from the gathering till the time when the sunrise loomed red— And then I would wearily take my way home And tumble, fagged out, into bed.

But now I am told that most doctors agree That jazz is doing them the good, And engaged in by middle-aged persons like me Will often bring fatal results; The habit is fixed and unbreakable now, But often I pause between pants— While the chill perspiration breaks out on my brow And wish I had not learned to dance.

(Copyright, 1927, by the Bell Syndicate, Inc.)

**PEN POINTS**  
 Nearly everybody buys new tires in the spring. What is so rare as a puncture in June?

So many "public-spirited" men get by with no contribution to worthy causes except a vocal one.

Fable: He was a rich bachelor and didn't think all his female acquaintances had designs on him.

Doctors get most of their living from people who have no other affliction except the spare cash to pay doctor bills.

Scientists say that in one instance digestion required forty days, but don't tell what bride made the biscuit.

The Panama Canal may be hard to protect, but what this country needs is a commission to invent ways to protect the taxpayer.

Once it was "a rag, a bone and a bank of hair." Now the rag is almost gone and the hair bobbed, but at times you see evidence of bone.

What a world! Gushing about ancient Greek buildings; wanting the boy to be a white-collar man because building isn't a job for the social select.

Americanism: Racing madly to get there; stopping to examine the wrecked car that tried the same fool stunt.

Public servants aren't like the other kind. They are never high and mighty until after they get the job.

Your vocal opinion of a man isn't worth a great deal while you're under obligation to him.

An educated man is one who realizes that many of the "old masters" are considered masters merely because they are old.

No more American could devote ten minutes of loving care to an apple and make it look like 10 cents.

Probable thought of Henry when it happened: "If I had been in one of my Lincoln's he couldn't have knocked me forty feet."

So a lot of new millionaires were made last year. If it isn't one thing that decreases the number of Democrats it's another.

Correct this sentence: "I'll spade a garden plot this year," said he, "and I won't lose interest when but weather comes."

Without a beard some men, like a billygoat, would lose all their dignity.

Many a man who is worth a lot of money is absolutely worthless otherwise.

Dancing would be awfully hard work if it wasn't such fun.

The flights of fancy beat all known aviators' records.

It's all right to be easy-going, provided you have absolute control of the brakes.

# LETTERS TO THE TIMES

[Name and address of writer must accompany all letters for this column. Letters of a personal nature or involving controversial religious questions are not acceptable.]

**Mothers of Men**  
 LOS ANGELES, April 21.—[To the Editor of The Times:] The possibility of "petticoat rule" will scarcely dismay the people of a country whose two brilliant historical periods are known as the "Elizabethan Age" and the "Victorian Era." They are too intelligent to forget the fact that those who guide their children through the first and formative years are the mothers of men. The sex having a large majority in the churches and a minority in the penitentiaries are not likely to run the ship of state around any factor other than the welfare of the long ago presumed to take well-nigh sole control of mundane matters. It is said that in order to rule wisely one should first learn to obey. The feminine half of humanity has had a long time of drill in this requirement, thereby being fitted for some share of sovereignty.

Unlike those in earlier centuries, the vast majority of men today welcome the increasing freedom of women in the things that make life worth while. Two men, whom I greatly admire, Dean Inge of London and Dr. I. M. Haldeman of New York City, are now showing themselves out of step with Christian progress in their attitude toward women. The dean's gloomy forebodings appeared in print some days ago and, according to the New York Times, Dr. Haldeman recently declared that "the teachings of morality are plainly evident in the church, but a thing to be feared even more than these teachings is the invasion of the pulpit by feminism that is now taking place. Feminism is that widespread disease that is putting women out of their place. It is not a question of brain, but following the teachings of Christ to bring a woman into the pulpit is to sin against that most holy of Christian institutions."

Dr. Haldeman and Dean Inge have overlooked the prophecy in Psalm 68:11, R. V.: "God giveth the Word; the women that publish the tidings are a great host." BELL HUNTINGTON MIX.

**Too Sweeping**  
 LOS ANGELES, April 21.—[To the Editor of The Times:] Gale's cartoon in your issue of this date (April 21) caricaturing our candidates for the municipal judgeships at the ensuing primary election is not fair, just nor generous.

With a single exception all of the incumbents are candidates to succeed themselves, and again with a single exception, all of the incumbent candidates have received the unqualified endorsement of the bar of the county through a vote of the members of the Los Angeles Bar Association.

I have practiced law in California for nearly forty years and most of that time in Los Angeles, and I wish to say that in all of my long experience I have never encountered a bench with a better average of ability or a higher sense of duty than our Municipal Court as at present constituted.

Moreover, most of the candidates seeking to supplant the incumbents are young men of excellent character and ability; and the fact that there are a few old fossils among this class of candidates, who are neither mentally nor temperamentally fitted for these important places, should not subject the entire list of aspirants to ridicule at your hands. W. H. ANDERSON.

**Uplifting Drama**  
 LOS ANGELES, April 22.—[To the Editor of The Times:] In these days of sordid sex and problem plays it is positively refreshing to witness anything as clean, entertaining and appealing as the play "Appearances."

"Appearances" is the work of a self-taught negro boy, Garland Anderson. In his desire to be of service he has followed the urge from within to write a play which would embody his conviction of man's ability to be anything he earnestly desires to be. He has proven his point by producing a well-constructed play with good plot, whose central theme is that truth, decency and determination always triumph.

The play has a strong appeal, thoroughly entertaining and does not emphasize any racial question. I wish everyone could see it as a tonic to themselves as well as encouragement to a deserving negro boy who has not the money to push his play to the point of popularity it so justly merits.

**Elbow Grease**  
 LOS ANGELES, April 25.—[To the Editor of The Times:] Hurrah for Horace E. Dodge, Jr., and more power to his elbow! He may not be the finest citizen in the world, but he has laid his fellow-Americans under obligation by taking a poke at the pestiferous reporter. May there be many more like him. T. E. PLATT.

**According to Paul**  
 LOS ANGELES, April 26.—[To the Editor of The Times:] One part of St. Paul is as binding as another, isn't it? Why then do the McPherson schismatics bother with quotations about women who cut their hair? Why do they not simply devastate her with a single quotation about women keeping silent in the churches? SAM MARTIN.

**Pictorial Brutes**  
 Robby, aged 4, was watching a man whose bare arm was tattooed all over in a marvelous manner. "Mummm," he said, "why does that man come out in pictures whenever he brushes himself?" [Tit-Bits, London.]

# WAR AND THE CRIME

BY DAVID STARR JOHNSON  
 It is generally held that the amount of crime, juvenile and adult, is greater now in proportion to the population in America than in any previous period, and also generally admitted that World War had something to do with this, either as a direct or indirect cause.

The destruction of homes and by its lifting of the veil which conventional society has drawn down the villainy of men, folly and weakness, for the war violence of emotion, good or bad, was a factor in the increase of crime. The sex having a large majority in the churches and a minority in the penitentiaries are not likely to run the ship of state around any factor other than the welfare of the long ago presumed to take well-nigh sole control of mundane matters. It is said that in order to rule wisely one should first learn to obey. The feminine half of humanity has had a long time of drill in this requirement, thereby being fitted for some share of sovereignty.

Unlike those in earlier centuries, the vast majority of men today welcome the increasing freedom of women in the things that make life worth while. **According to Paul**  
 LOS ANGELES, April 26.—[To the Editor of The Times:] One part of St. Paul is as binding as another, isn't it? Why then do the McPherson schismatics bother with quotations about women who cut their hair? Why do they not simply devastate her with a single quotation about women keeping silent in the churches? SAM MARTIN.

**Pictorial Brutes**  
 Robby, aged 4, was watching a man whose bare arm was tattooed all over in a marvelous manner. "Mummm," he said, "why does that man come out in pictures whenever he brushes himself?" [Tit-Bits, London.]

# TRIAL DEL

Transfer to Federal Penitentiary  
 Postpones Hearing

Will be Sent to State Penitentiary  
 Agents Indicted

Fatal Car Crash  
 Going to the Involvement of the case, trial of Federal Agents Frank Farley and James J. Connelley, indicted with charges of murder, did not proceed yesterday in the Federal court.

Farley is charged with the murder of an automobile driver and killed E. J. Connelley, a Federal agent, near the morning of the 6th in the case of the fatal car crash. The case was postponed until the 10th of May.

In the meantime, however, the case of the Federal Agents was postponed until the 10th of May. The case was postponed until the 10th of May.

# Cooler Dry Goods Co.

FOUNDED IN 1876

**Well Known Makers as Dix, and Bob Evans**

**Also New Maid's Aprons, Bands, Caps, etc.**

**Waitresses' Caps... Maid's Caps... and Nurses' Caps in Variety**

Some with Rio Ray trimming, hemstitching, gathered or self-shallop tops, with black ribbons, others of all white lawn.

**Color is now the vogue in**

## New Maids' Uniforms, \$2.95 and up

—For tea and bridge parties, the maid's uniform may match, or harmonize with the color scheme of the room.

—Fashioned of nurse's cloth . . . mercerized and silk poplin . . . Indian head . . . broadcloth . . . seersucker . . . gingham in stripes and plain blues . . . also tub silk and mohair.

*These uniforms are smartly tailored and for conservative neatness no better could be found.*

**Dainty Aprons for Nurses, Maids and Waitresses**

In apron, nurse and wait. Some with shamrock straps and lawn ties. Others have ribbon ties.

## Nurses' Uniforms

*Known as the "Prince of Wales"*

### Priced \$3.95

—Tailoring of the best and made in the smart "coat" fashion with reversible front of fine washable fabrics such as linensheen, Ocean pearl buttons with detachable metal shank buttons.

—Two generously large pockets that every nurse looks for in a uniform, and one small one are featured on this belted back uniform. Size 34 to 44. In long and short sleeve styles.

*Shown in Our Uniform Section.*

(Cooler's—Fourth Floor)

## Individuality In "Shorts"

*Glove Silk Tailored Modes*

### \$3.95

**Knicker "Shorts" \$3.95**

—Clever little short bloomers for the miss who wears the rolled stockings. Fashioned of fine quality glove silk and beautifully tailored with reinforcements at wearing points.

**"Habitee" Shorts, \$3.95**

—A new style that is proving very popular, as it is made along the line of the riding habit knickers. Well reinforced and nicely tailored, with the snug knee and fitted top. An elastic across the back allows for fullness.

**Boyish "Shorts" \$3.95**

—Lustrous silk fashion these straight little "track pants" for the girls. Cool, comfortable and very practical, yet daintily feminine with a fine picot edge finish at the knee.

(Cooler's—Fourth Floor—Knit Underwear Section)

## Fill Ugly Hollows With Firm Flesh

### Gain Pounds of Weight in 3 Weeks with YEAST and IRON or Pay Nothing

**"Gained 10 Pounds"**  
"I can truthfully say that I have gained so much weight from anything in so short a time. Before I began taking IRONIZED YEAST I was 10 pounds underweight, but now I am back to normal again."  
Mrs. M. P. A. Berry, Park, N. J.

Thousands are amazed at IRONIZED YEAST. They can't understand the magic by which IRONIZED YEAST transforms thin, run-down, pasty-faced, hollow cheeks into well-filled-out, clear-skinned, rosy cheeks. Those who have been benefited could tell you for their letters tell us how a one course treatment of IRONIZED YEAST has given them 5 to 10 pounds of firm flesh, cleared the skin, improved digestion, assimilation and bowel action. It has put them on their feet again—given them a new interest and pleasure in life.

**How New Yeast and Iron Works These Wonders**  
Vegetable iron and yeast have always been known as ideal blood and body builders. But it remained for us to combine these two vital elements in a highly concentrated form.

IRONIZED YEAST speeds up assimilation so that you get the full benefit of the food you eat. It clears the blood of impurities that clog complexion, giving you a nice, clear, healthy skin. It will pick you right up and fill you with the pep and "zip" you have always longed for.

If you are below normal weight—take warning! Underweight people have less resistance to disease. Do something now to put on good firm flesh. Take IRONIZED YEAST. It gives you the weight-building benefits of cod liver oil. See your body build up with added pounds of good weight. Notice how your skin clears up, your digestion improves and you feel new strength and pep. Absolutely safe, containing no harmful drugs. Get your IRONIZED YEAST today! Nice, tasty, pleasant-to-take tablets—60 to a bottle.

**Try It on "Money-Back" Offer**  
Go today to any drug store and get a full size treatment of IRONIZED YEAST. If after this generous trial you are not delighted with effects, ask for your money back. It will be refunded immediately. Inconvenient to buy from drug store, send \$3.00 direct to THE IRONIZED YEAST CO., ATLANTA, GA. DISK 932.

## For Your Next Eastern Trip the Northern Pacific

WHILE you are on the Pacific Coast, why not see more of it? If you go North, then East, the Sierra Nevada, the Coast Range, the Sierras, the Cascades, the Olympics, the Rockies lie in your path. The Northern Route East costs a little more but it's worth it.

Visit Portland, Tacoma, Seattle and Spokane. The string climate is ideal. Columbia Highway and Rainier National Park are delightful auto trips.

Enjoy the restful cruise on Puget Sound from Seattle to quaint British Columbia and Vancouver.

Then follow the trail of Lewis and Clark on the Northern Pacific through the great Northwest from Seattle to Chicago.

To return the Northern Pacific way means travel luxury without extra fare on the North Coast Limited. Famous good meals—quiet and efficient service—thoughtful, courteous attention. The most beautiful observation club-car in America—shower bath—barber shop—maid and valet service—brandy—library—broad sightseeing platform—restful chairs.

If you have time, stop for a 4 1/2 days' tour through Yellowstone Park. You'll never forget Old Faithful—the sublimity of the Grand Canyon—the bizarre Paint Pots—the friendly animals—and Yellowstone Lake.

Season June 19 to Sept. 20.

I shall be glad to send you any information—just mail the coupon.

## PLAYERS WILL AID EXHIBIT

Sally Phipps and Nancy Nash to be at Manufacturers' Display Opening on Next Saturday

Hostesses of honor for the formal opening of the Southern California Manufacturers' Exhibit in the Southwest Building, 130 South Broadway, next Saturday, will be Sally Phipps and Nancy Nash. Both are Fox players and the film company has given its endorsement to their appearance.

Sally Phipps is a 1927 Wampas baby star. Frank Borzage discovered her here, and she first appeared in "Early to Bed" which she has just finished the leading part in "Girls" and recently made "Love Makes a Fool" and "The Girl in the Red Velvet Swing".

## Check Given to Auto Salesman Held Payment

A check drawn by the purchaser of an automobile to the salesman with whom he dealt constitutes payment to the dealer even though the salesman absconds with the money, according to a ruling handed down yesterday by the Second District Court of Appeal.

Acting Justice Johnson wrote the opinion in the case of the suit filed by the California Steamship Company against A. W. Treadwell. Treadwell bought a machine from the Steamship Company through a salesman and gave the salesman a check at the time delivery was made on the car, according to the opinion.

It was contended by the Steamship Company that the check was not valid because it was not cashed. The court, however, ruled in favor of the salesman and not the dealer. The purchase price never really had been in possession of the company. The suit was to collect \$2000 from Treadwell, which the appellate court refused to sanction.

## Girl Champions Will Take Part in Saugus Rodeo

Many champion riders will fight to protect their titles at the second annual Baker Rodeo at Saugus, Sunday, when they compete with other champion winners from the world's most famous round-ups. More than 200 contestants, all champion contenders, have signed for the sporting contest.

Stellar names among the women contestants include Betty Smith, champion trick rider at Cheyenne last year; Vera McQuinn, the 1926 Cheyenne rodeo queen; and Lillian Shroyer, Texas champion who does every stunt known to rodeo competitors, and who is entering her first exhibition outside her home State.

Among the cowboy winners of first money are listed: Ray Adams, steer-roping champion at Cheyenne last season; Buster Gardner, Fred Hunt, Bob Adams, Mike Stewart, Lloyd Saunders, and Gordon Jones.

## Nationalities Represented in Tolstoy Drama

In the making of "Resurrection," the drama at the Criterion Theater, men and women of a large number of various nationalities lent their efforts.

Rod La Rocque comes from a prominent French family. He has the leading role of Prince Dmitri in the play.

Dolores Del Rio, a Spanish senorita, interprets the role of the Russian peasant girl who is entering her first exhibition outside her home State.

Count Ilia Tolstoy, son of the Russian author, Count Leo Tolstoy, assisted Carver in the filming of "Resurrection." It is that of a Russian.

Belasco, Butler and Davis of the Belasco Theater are reported to be planning to introduce a series of special matinees with Warner Oland as the star and producer. Oland is better known as the villain of the Theater Guild. The play is a study in greed by Jacques Couperin, who also acted in it. Oland is trying to induce her to come to Los Angeles and play her original role in "Brothers Karamazov." Mr. Oland plans to play the role of the father.

**WRITES WHEN NOT ACTING**  
Richard Tucker, busy as the proprietor of a night club in "Dearie" for Warner, has his own night club these days when his work is finished at the studio. For Tucker has a war story founded on actual facts, for which he is using his free evenings to put in story for movie, plain evidence to produce it himself or sell it provided he can appear in it. The villain role is the one that intrigues him most.

**PLANT TO BE INSPECTED**  
Two hundred purchasing agents accompanied by a score of prominent business executives and officials of the Chamber of Commerce are scheduled today to make a tour of inspection of the United States Electrical Manufacturing Company plant, 200 East Slauson avenue, as part of a buy-at-home campaign initiated by the local buyers. It was announced yesterday by Arthur E. Carlson, purchasing agent of the Pioneer Paper Company.

**HAS TWO OFFERS**  
Charles K. French has just finished a Fox production, and is now deciding which of two "one-reelers" to make for a series of comedies to be made here, and the other a series of Westerns to be made on location in Wyoming.

## WILL BE LANGUID ORIENTAL

MacLean Makes Unique Costume Comedy as Next Effort; Mary Pickford Chooses Charles Rogers for Lead; "Camille" Booked at Egyptian

Very few feature-length costume comedies of the rollicking order have been seen, and in none of these has that famous film favorite, Douglas MacLean, ever cavorted.

But MacLean is going to remedy this state of things by appearing in an oriental slap-stick comedy as his next starring vehicle for Paramount. The picture has been decided upon, it is "Soft Cushions," and will be a fast-moving, plentifully gagged tale, we are told.

For several years MacLean has wanted to turn this unusual original screen story from the pen of the late George Randolph Chester. He believes that the public is now ready for the introduction of striking novelty in the comedy field, and he is planning to pioneer in "Soft Cushions."

MacLean's announcement made "The Thief of Bagdad," but this was a comic fantasy, and MacLean's costume comedy is a different matter. It is a long-term contract by MacLean. Edward Francis Clive, who piloted MacLean so successfully through "Let It Rain," will direct "Soft Cushions." Actual filming of the story will start this week at the Fine Arts studio where MacLean recently established his production headquarters.

MacLean's recent signing of his plans follows his recent signing of a new picture-to-picture contract with Paramount, and his decision to postpone for a time his contemplated filming of "See You Later" originally announced as the successor to "Let It Rain."

Mary Pickford has chosen her leading man to support her in "Paradise Alley," to be made under the direction of the late Douglas MacLean. And that she has made a wise and happy choice you will agree when I tell you that he will be none other than Charles Rogers, who has been loaned by Paramount to MacLean for the purpose of playing the hero in "Soft Cushions."

Rogers has been steadily going ahead of late in his popularity. He has an engaging personality, should be able to portray the "Prince Charming" of this story most effectively.

MacLean and Hope Loring have been hard at work on the screen adaptation of "Soft Cushions" for some time past several weeks, and are now nearly ready to begin production.

MacLean has been actively been at work on this story for two years, declared Mary Pickford yesterday, "for I have seen it in my mind all the time, and have even visited the 5 and 10-cent emporiums for atmosphere and incident, since I am to play the heroine in one of these stories."

Asked what struck her most in relation to the girls who serve in the picture, Miss Pickford answered: "The big crowds they have to wait upon, and the terrible weariness they must feel from standing on their feet all day; also the real appearance of all the girls and actual beauty of many of them."

The crowds shopping there interested me deeply, too. I saw one woman trying to get a hat out of 10 cents! And there was a man actually buying a wedding ring! And then there was a poor little youngster who wanted a toy, but it cost 15 cents, and his father, after painfully searching his pockets for five minutes, could find but 10 cents."

Joseph Schenck Talks  
While there is a big and impressive announcement from Joseph Schenck in another column of this paper, I found it interesting to chat with the film magnate yesterday following his return from New York.

Charles Chaplin, who is more full of enthusiasm over his work than he has been in some time, said Schenck with a broad smile, "wants to make two pictures a year hereafter, and really thinks he will accomplish it."

Norma Talmadge, his wife, is to take a long rest, now that "Camille" is a success. "Camille," you know, "is to be released at Grauman's Egyptian, and without a prolonged rest, but both the picture and the actress are so popular that I wish to provide the very best music for the picture," said Schenck, "preferably a great orchestra of stringed instruments, but I will have no prologue if I have my way about it. I think picture lovers go to the picture theater to see pictures and not vaudeville."

"And this," he went on, "is to be the policy in all the United Artists' theaters throughout the country. These theaters will number about twenty."

Asked whether any pictures outside the United Artists' output would be shown, he said: "Certainly—pictures like, for instance, 'What Price Glory.' We shall make every endeavor to obtain for our theaters, but principally, of course, we shall use our own productions."

D. W. Griffith will be here in the course of about ten days, said Schenck, and will at once enter upon his duties as director-general.

Herbert Brenson, as heretofore announced, will direct "Sorrow and Son." Just who will play the part of the father isn't settled, but both the names of H. B. Warner and Percy Marmont have been mentioned in connection with the picture.

Constance Talmadge is to have rather a shorter vacation than she expects to enjoy, she will almost at once start work in "Breakfast at Sunrise," with Hal St. Clair directing.

Schenck decided himself much delighted with reports of the progress of "Topsy and Eva," which the Dunning sisters are making, and which they have nearly finished.

Norma Talmadge may possibly take a trip to Europe, though this, said Schenck, is very hazy. She has been

stories under consideration. "The Woman Disputed" and "East of the Setting Sun," adapted by Eric Von Stroheim from George Barr McCutcheon's story.

Walter Goes in It  
Walter Goes has signed for a nice role in "The Last Outlaw," which Arthur Rosson will direct for Paramount, according to word received from that organization yesterday.

Jack Pickford, Here  
The camera isn't always on hand to record heroic acts—as some maker of the copy-books ought to say, if he hasn't already. And Jack Pickford was one of those unrecorded heroes on Tuesday, when, driving along a road in Berkeley Hills, he discovered a small boy's horse running away with his rider. The animal was entirely out of control, going at a tremendous clip, when Pickford rushed his car a few feet ahead, and the boy was thrown, he would fall off instead of being hurt. He waited a minute or two for the arrival of the animal, then dashed at the horse's side and stopped him, with the boy badly frightened, but uninjured.

Pickford stopped a few moments to quiet the child and animal, and the boy finally led the animal away. Jack didn't learn the child's name, according to my informant.

Ruth Dwyer Hines  
Johnny Hines may be a little young man in some ways, but he certainly is true professionally to his leading lady when he finds a good one.

For the third consecutive time Ruth Dwyer is playing an important feminine role in a Johnny Hines feature comedy. She has just been selected to portray one of the leading feminine characters in "White Pants Willie," which Hines is now making at the Fox-Art studios. Miss Dwyer Hines made her first National film in Hollywood from New York two months ago. But she has played opposite Monty Banks in "A Perfect Gentleman," and Edward Everett Horton in his latest Paramount comedy.

**St. Johns Tale is Basis of 'Red Kimono'**  
Perhaps no Los Angeles author has quite the understanding of Hollywood film life as Adela Rogers St. Johns. Her successful story "Skyrocket," was considered by many to be the most accurately drawn in characterization of city story based on studio life.

Her long experience dealing with life in newspaper work fitted her to do the story for Mrs. Wallace Reid's "The Red Kimono," which is to open the new Arcadia Theater at a special premiere Saturday afternoon at 2 o'clock.

Taking her material from the Los Angeles court records, she has written a story coldly realistic and filled with dramatic tension, an announcement says.

Priscilla Bonner portrays the leading role.

The Arcadia is the newest acquisition of Principal Theaters' circuit of national theaters and its opening is to mark the addition of another new house for Los Angeles.

**COCOANUT GROVE TO HONOR HERB BROWN**  
The evening of May 3, next, has been designated as "Doll Dance" night at the Cocoanut Grove at the Ambassador, in honor of Nacio Herb Brown, the Los Angeles composer, whose local song hit has become a national one. The hotel is arranging a number of special features for this event.

Miss Doris Eaton, who sang and danced in the original Music Box Revue, has posed for an exact miniature of herself in the costume she used in the "Doll Dance" number. This miniature will be copied at the Ambassador Doll Shop and dolls in replica of Miss Eaton in the "Doll Dance" will appear on the tables at the Grove on Tuesday.

Herb Brown himself will play, with the orchestra, his own interpretation of the number and also a melody of his previous song hits. In conclusion he will introduce for the first time in public his new number, "Moonlight Waters," which has not yet been published.

**"IS ZAT SO" NEARS LAST LOCAL SHOWING**  
"Is Zat So" is nearing the end of its long run at the Belasco, and but one more week remains of this comedy or a prize fighter and his manager and their entrance into high society. The Belasco announces that an extra final performance will be given on May 8, next.

James Gleason, Robert Armstrong and the others of the cast are preparing for a coast tour which will start at the Spreckels Theater in San Diego on May 9, next.

On the same date, Belasco, Butler and Davis, by arrangement with Charles L. Wagner, will present at the Belasco Kenyon Nicholson's play of American tent show life, which is being offered in New York now. Fred F. Butler is making the production, and has assembled a cast, including Louis Bessillon, Mabel Jullienne Scott and Isabel Withers.

**MILTON E. HOFFMAN GIVEN NEW POSITION**  
Milton E. Hoffman, formerly executive manager of the Paramount studio, is the newest member of B. P. Schulberg's "production cabinet," according to announcement yesterday.

This move takes Hoffman from his business detail of studio operation and places him in the ranks of the picture creators, who comprise Schulberg's production staff.

At his first assignment under the new management, Hoffman will supervise "Beau Sabreur," companion picture to "Beau Geste." Hoffman is one of the pioneer studio executives of Hollywood.

## SCIENCE NEEDS BETTER TOOLS

Cosmography Reaches Limit for Present Equipment

Larger Telescopes and More Rapid Photography Needed

Dr. E. P. Hubble Confident Instruments Forthcoming

PARADISE, April 27.—Cosmography, the study of the universe and its parts in their relation to each other, has gone about as far as it can with the present equipment, and the next steps will be larger telescopes and faster photographic plates, according to Dr. Edwin P. Hubble, noted astronomer of the Mt. Wilson Observatory.

Dr. Hubble's special study of late years has been the far-distant stars which he has discovered to be parts of systems comparable to what has ordinarily been termed the universe. He has opened up vast new fields by showing that what had previously been considered the universe is merely one of a large number of similar, if somewhat smaller, systems.

Larger telescopes and more powerful equipment can bring these little-known realms closer to the eye of the scientist, and will have to be obtained if what lies beyond them is to be reached. The chief obstacle to the construction of larger instruments is their great cost. But this barrier is expected to be hurdled eventually. Already plans for a hypothetical instrument dwarfing the largest present telescope have been advanced by Dr. E. P. Hubble.

"The research man now stands at the very frontier of knowledge," Dr. Hubble says, "but he is confident that the tools with which he can push forward will be provided."

## Crash of Truck and Bus Leads to Damage Suit

VENTURA, April 27.—Growing out of the accident on the afternoon of March 30, last, when a truck load of laborers collided with an Ojai stage at Santa and Kalamazoo streets, resulting in the death of three of the men and injuries to the remainder of the fifteen men on the truck, damages suit totaling \$12,500 today has been filed in the Superior Court against H. M. Hunt, owner and operator of the stage. According to the complaint, the driver of the truck, Edward J. O'Connell, was negligent and careless driving is held responsible for the accident and resulting fatal injury to the three men and injury to the others. It developed at the Coroner's inquest following the death of the three victims, that the driver of the truck, hearing the fifteen Mexicans said his foot slipped off the brake and the sleeve of his coat caught on the wheel, causing the truck to crash into the side of the stage and overturn.

## SAVES ACCUSED BUT IN TROUBLE HIMSELF

SANTA ANA, April 27.—When the star witness for the defense case of Richard Lang, charged with operating a dairy without a license, testified that he owned the dairy and that he was the driver, the jury found him guilty. The jury also found that the dairy was operated by Zumburn under Lang's name for business reasons. The dairy in question is located in the county near the Buena Vista Road on West Fifth street.

## IGNORES TRAFFIC TAG. NOW HE'S IN JAIL

SANTA ANA, April 27.—Frank J. Bell, Los Angeles, accused of repeatedly driving a car without a license, today was sentenced to jail by Justice Kenneth Morrison. Bell was arrested on the charge of driving without a license after he was stopped by a traffic officer. He was held in the Orange County Jail last night to serve a five-day sentence. Bell was sentenced to jail by Justice Morrison after he had been arrested on the charge of driving without a license. He was held in the Orange County Jail last night to serve a five-day sentence. Bell was sentenced to jail by Justice Morrison after he had been arrested on the charge of driving without a license. He was held in the Orange County Jail last night to serve a five-day sentence.

## BEANS TO GET PUBLICITY

Growers of California Limas Planning Extensive Campaign of National Advertising

VENTURA, April 27.—The California Lima Bean Growers' Association is perfecting plans for an extensive campaign of national advertising and promotional sale work on California lima and baby lima beans. This is to begin in the near future as soon as details can be worked out.

This campaign will include not only advertising in women's magazines, but also in trade papers and a certain amount of newspaper space with special messages and solicitation of the interest and co-operation of wholesalers, retailers, hotels and restaurants, with the view to substantially increasing the consumption of these two specialty fine varieties of California beans.

A statement issued today by the association says: "The market on lima beans has been quiet during recent weeks. The seemingly slow movement of lima is partly accounted for by the

## SHATTERED ROMANCE STORY

Angelino Accused of Invading Home of Women Declares Suit First Favored by Girl's Mother

GLENDALF, April 27.—Behind the arrest of Paul Corne, 717 Bailey street, Los Angeles, on a charge of disturbing the peace by invading the home of Mrs. Annie Sousa and her daughter, Louise, and attempting to force his attentions on the girl, lies a story of broken romance, as unfolded in the court of Judge F. H. Lowe today, when Corne appeared for trial.

Corne, who is declared to be a reputable business man in Los Angeles, told the court that he had been introduced to the girl several months ago by a friend whom he had asked to present him to some girl who might be willing to marry him. The girl at that time was a waitress in a restaurant, but shortly after he met her she left her position and he was only last week that he obtained her address in Glendale.

During the progress of the courtship, Corne told the court, he took Mrs. Sousa to Compton twice to visit relatives and bought groceries for the family, besides driving the girl to her home at night to save her carfare.

Mrs. Sousa, he claimed, seemed to approve his intentions to marry her daughter, but she apparently changed her mind when she entered the house on Monday night and saw him talking earnestly to the girl, calling two policemen and having him arrested. After hearing Corne's story Judge Lowe released him without bail to appear tomorrow to hear the judgment of the court, and ordered him and effects turned over to him. Mrs. Sousa drew a sharp reprimand from the court when she interrupted to call Corne a "big liar."

WOMAN LOSER CAR IN PECULIAR ACCIDENT  
UPLAND, April 27.—Mrs. M. O. Humble of 448 Sixth avenue, this city, is minus a car today as the result of a peculiar accident on the Foot-hill Boulevard west of here late yesterday. Mrs. Humble was driving west on the boulevard when a second machine struck her own, causing the latter to swerve from the highway at the intersection of the street with the Claremont, striking a protruding gas main with sufficient force to break into the main in a most peculiar manner, causing the car to be speedily consumed by fire, together with a number of personal articles.

Mrs. Humble said today that she could identify the driver of the machine that caused the accident.

CHANCES BRIGHT FOR AIRPORT AT VISALIA  
VISALIA, April 27.—Visalia may yet have a municipal airport, if plans of the Chamber of Commerce are realized. President Floyd Byrnes has appointed a committee to arrange details of a proposed new airport on the intersection of the Visalia-Hanford highway, and the highway at Cochen, near here, for creation of a local airport project.

Impetus was given to the movement to acquire the eight-acre tract for the airport project, when a new building, owned by Sp. Sweet and Edward P. M. Deeds, was christened "Miss Visalia" at a luncheon given at the site of the proposed airport project.

Repertoires of the city yards call for the purchase of city lots in the Pasadena sewer farm south of Mission Road. This city has an option on seven acres. The yards now are located on North Third street.

ALHAMBRA, April 27.—When creditors flocked to a local radio shop in company with an officer with attachment papers they found, among other assets, a cinnamon bear. The animal has been one of the featured attractions of the shop for several months, the proprietor having captured him when a cub on a hunting trip.

Now the bear is the property of the Alhambra-San Gabriel Humane Society, having been seized, with proper disclaimer, by the humane society, which declares Riverside will enter into a new phase of architecture.

Property owners on Orange street have petitioned to be allowed to grant easements for the widening and will construct the arched for support of upper stories. First structure under the new plan will be of Mediterranean style to be erected this summer by the Security Title Insurance and Guarantee Company. Plans were approved yesterday for this office building by the City Council.

VALLEY MEN GOING TO JUMA CONFERENCE  
EL CENTRO, April 27.—Directors of the Imperial Irrigation District accompanied by a large delegation of landowners in the valley expect to leave tomorrow to attend the Yuma conference of the Fact-Finding Commission appointed by Secretary of the Interior, Charles D. Ickes, to secure data bearing on Colorado River legislation. The district board has arranged to convey Secretary Work and members of the commission on an inspection trip along the levee system in United States and Mexico and to present data bearing on the urgent need for flood relief for Imperial Valley.

SHAFTER VOTES FOR UTILITY DISTRICT  
SHAFTER, April 27.—Voters of Shafter public-utility district by a majority of 48 to 1 today voted to create a utility district to increase and distribute over a wide area the domestic water supply of Shafter, at an estimated cost of \$30,000.

Several new and larger water mains will be laid, and a steel tower and tank will be erected and connected to the water main.

Within sixty days another election will be held for the election of three directors of the district.

## AVOCADO SHOW SETS RECORD

Goes Into Last Half With New Attendance Mark

Space Found to be Too Small for All Exhibits

Entertainment Feature Draws General Comment

San Bern has the Grape Show. Pasadena has the race. Whittier will hold the World's Fair.

WHITTIER, April 27.—The fourth annual avocado show, now on here, goes into the last half today, with a record attendance and the finest display of avocados ever assembled in Southern California. According to Harry D. Matthews, producer, so keen has been the interest of exhibitors that display place was at a premium before the show opened, and he could have utilized 50 per cent more ground space than is now in use.

Every variety of this aristocrat of fruits of display, from the small seedlings to the choicest budded fruit, and even the lowly, unpollinated "cucumber" variety is shown as fresh fruit. The three former shows have stimulated interest to the extent that thousands of visitors are daily visiting the display.

Auto dealers and other tradesmen, appreciating the widespread publicity their wares will attain by being shown at the avocado show, have taken every available foot of ground floor space, and have made some splendid exhibits.

The joy zone is being generously patronized and the excellence of the music and the vaudeville numbers presented every evening is a subject of general comment.

It is expected that Thursday evening will be the record-breaking night. Bert Collins, the popular Mexican, whom Whittier claims as his own, is expected to appear at the exhibition house of boxing, Colima has hosts of friends, and a large delegation from Los Angeles and Hollywood is also expected to attend.

By the time the show closes, the Black Bottom and the Charleston by local dancers and professional acts from Los Angeles will add to the gaiety of the entertainment, and a "country store" will climax the evening's activities.

This evening the J. C. Penny store put on an interesting fashion show for one of the numbers of the entertainment.

FORGER CHASE ENDS AS DAVIS PLACED IN JAIL

SAN DIEGO, April 27.—Winding up the investigation of the passing of a \$5000 worth of bad checks on a United States National Bank, M. D. Davis, 41 years of age, was lodged in the City Jail today, according to local police.

Davis' arrest by Sheriff Sweeters of Riverside county followed the trailing of the fugitive by an officer of the bank, who kept on his trail down to Tijuana, back to the city of San Diego, and finally to the city of San Diego, where he was arrested.

The checks, half on the order of the San Diego National Bank, were deposited by Davis on the order of the bank, and the bank was given \$4000 in cash and \$1000 in travelers' checks, the rest being placed to his credit.

The money and checks were held out were on two of the checks, bearing what purported to be the indorsement of J. C. Davis, a local man, whom Davis had done business, and who was known at the bank. Shortly after the money was cashed, Davis found that Davis' indorsement had been forged.

CREDITORS GET BEAR

Attachment Officers Find Bruin in Store They Take Over

ALHAMBRA, April 27.—When creditors flocked to a local radio shop in company with an officer with attachment papers they found, among other assets, a cinnamon bear. The animal has been one of the featured attractions of the shop for several months, the proprietor having captured him when a cub on a hunting trip.

Now the bear is the property of the Alhambra-San Gabriel Humane Society, having been seized, with proper disclaimer, by the humane society, which declares Riverside will enter into a new phase of architecture.

Property owners on Orange street have petitioned to be allowed to grant easements for the widening and will construct the arched for support of upper stories. First structure under the new plan will be of Mediterranean style to be erected this summer by the Security Title Insurance and Guarantee Company. Plans were approved yesterday for this office building by the City Council.

VALLEY MEN GOING TO JUMA CONFERENCE

EL CENTRO, April 27.—Directors of the Imperial Irrigation District accompanied by a large delegation of landowners in the valley expect to leave tomorrow to attend the Yuma conference of the Fact-Finding Commission appointed by Secretary of the Interior, Charles D. Ickes, to secure data bearing on Colorado River legislation. The district board has arranged to convey Secretary Work and members of the commission on an inspection trip along the levee system in United States and Mexico and to present data bearing on the urgent need for flood relief for Imperial Valley.

SHAFTER VOTES FOR UTILITY DISTRICT

SHAFTER, April 27.—Voters of Shafter public-utility district by a majority of 48 to 1 today voted to create a utility district to increase and distribute over a wide area the domestic water supply of Shafter, at an estimated cost of \$30,000.

Several new and larger water mains will be laid, and a steel tower and tank will be erected and connected to the water main.

Within sixty days another election will be held for the election of three directors of the district.

## REVIVES TALES OF BURIED TREASURE

Crumbling Adobe Last Trace of Spanish Days

MONTEREY PARK, April 27.—Its walls undermined by recent heavy rains and by the digging of treasure hunters who have been lured for years by tales of buried gold, the old Repetto adobe, one of the historic landmarks of Southern California, is fast crumbling to decay.

Recently the sound of a crash echoed over the hills south of this city, it was the collapse of one of the walls of the structure. Those who were present at the time were interested in its history, for that the adobe was built and the building was a comparatively short time the entire relic will have disappeared.

Around this adobe centers a fascinating story that is still vividly remembered by a few descendants of California pioneers who were directly connected with the first settlement of the hills south of Monterey Park. It is a story of love and work, festive scenes and happy days, of stirring events, and of picturesque bandits.

The Repetto adobe is linked with much of the old and some of the later history of the State. It recalls the time of the Spanish days, and their great land holdings and their colorful careers.

More than fifty years ago a poor Genoese, Alessandro Repetto, came into possession of the land on which the adobe was built. He had come to be known by his name. The adobe was built, however, by his son, Don Antonio, who was a merchant in San Gabriel. In the final breaking up of the big estate, the adobe was sold to the city.

Repetto was a doctor in the Italian army but came to California when still a young man. It is told that he worked at various jobs and that he saved his money.

He had one son, Timoteo, who lives on a ranch south of Wilmar, and who remembers his father telling him that he was once a doctor in the Italian army, and that he was a merchant in San Gabriel.

Alexandro got his start, it is related, when one day he found a purse containing a small sum of money. With this he started a business, and he had saved he purchased a 4000 mortgage that was against Jose Carmelo Lopez's property, and he was counted in those days as a successful man.

Repetto also had considerable renown as a dispenser of home remedies and many are the tales of his cures that are remembered by persons living here today.

His wealth, however, gained Repetto other and more unpleasant fame. In 1874, it is said, he was killed by a band of desperadoes, and his body was thrown into the sea.

His death was a tragedy, and his body was never recovered. His death was a tragedy, and his body was never recovered.

## SWINDLING FRESNANS

Correspondence Found Wanted

Required Examination to be Impaired

Woman's Refusal to Disclose Fraud

FRESNO, April 27.—The Fresno Police Department today is conducting an investigation into the activities of a swindler who has been operating in the city for some time.

The swindler, whose name is not being disclosed, is alleged to have been operating a scheme in which he would induce a woman to disclose the contents of her safe, and then would steal the contents.

The woman, who is not being named, is alleged to have been induced to disclose the contents of her safe, and then the swindler would steal the contents.

The woman is alleged to have been induced to disclose the contents of her safe, and then the swindler would steal the contents.

## Pictorial Slants at the Day's News from Southland and Abroad

Playing Clowns for the Benefit of the Entire Trojan Campus, a group of the fortunate young men at University of Southern California pledged for Sigma Sigma, the Junior men's honorary fraternity, are caught by the camera above. The trampish appearing young man at left is none other than Morley Drury, captain of 1927 football team. (Times photo.)

One Hundred and Sixteen Words Every Minute for a period of thirty minutes is the record of Stella Willins of New York, amateur speed typist of the world, shown above at the machine on which she established the record. (P. & A. photo.)

Largest Order of Typewriters Ever Placed with an institution of instruction, given this week by F. J. Young, (middle) purchasing agent for Board of Education, to E. A. Trefzger (left) local manager for Underwood Company. Record is figure at right.

What is Known as Legitimate "Body Check" is being effectually demonstrated in the accompanying picture by Shapiro of Brooklyn, with Capt. Merrill of Louisburg, Pa., as the victim, in recent lacrosse game between teams representing the two cities. (P. & A. photo.)

American Marines Are Sleeping With One Eye Open in the Shanghai District, prepared for general alarm at any time of day or night. In the above photo, one of the latest to be received from the Chinese war zone, Brig-Gen. Butler's "devil dogs" are shown tumbling out and falling in in response to such an alarm. (P. & A. photo.)

Bel His Only Top That Lincoln Would be Elected, and has voted for every President since that time. This is proud boast of G. A. McAmis (shown above with Mamie Coburn) who will cover Friday night's political rally of United Veterans of Republic at Philharmonic, as dopest for his buddies at Sawtelle. (Times photo.)

Behind Giant Merger involving West Coast Theaters, Inc., consummated here yesterday, is Mike Gore, president of the well-known chain of theaters.

Summer or Winter, furs are in fashion, and the summer fur is white fox. May McAvoy displays ideal hot weather (?) ensemble in the photo above.

One of the Many Novel Ideas in Beach Apparel which will be introduced at the second annual bathing beauty parade at Ocean Park, May 22, is pictured above, comely Lucille Miller acting as model. It's the hip pocket in which rubber powder puff is carried. (Times photo.)

Torture Has Been Taken Out of Sunburn, according to local medics, through lotion introduced recently by Charles (Kip) Whitehead, chief nurse at Receiving Hospital, shown applying cure to arm of Mary Higgins with aid of F. B. Cromble. (Times photo.)

Death of Noel Davis and Lieut. Wooster in plane crash this week, puts it squarely up to Bert Acosta and Lloyd Bertaud, pictured left to right above, to maintain the prestige of American flyers in trans-Atlantic flight, New York-to-Paris. (Acme.)

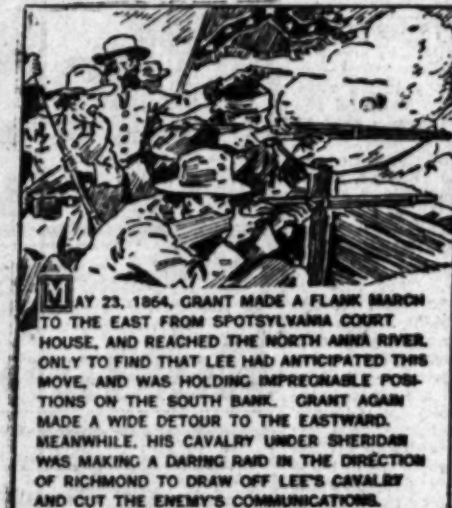

A Lot of Modern Fads Come From Hollywood, not all of them originate in the City of Angels. For instance, Elizabeth Allen of the Hollywood Company, who lives in the heart of Los Angeles, introduced the toy dog purse, which she is wearing in above photo.

## OUR HISTORY IN PICTURES 702

## The Battle of Cold Harbor.

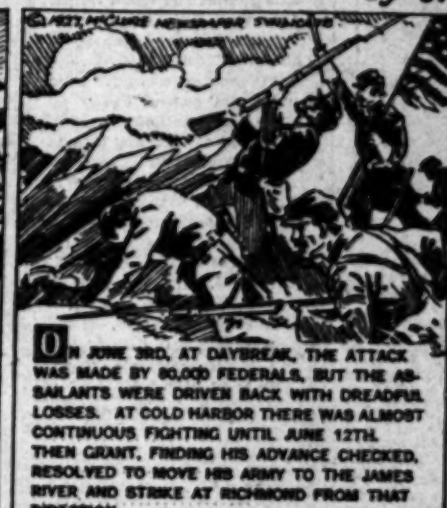

## by J. CARROLL MANSFIELD

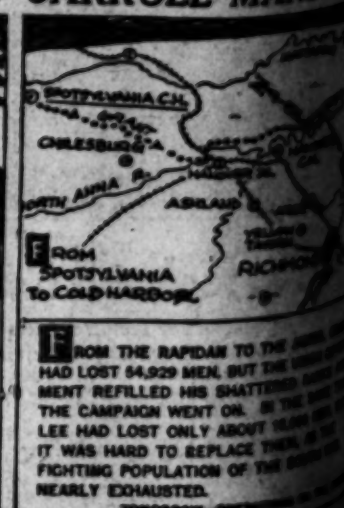

MAY 23, 1864, GRANT MADE A FLANK MARCH TO THE EAST FROM SPOTSVYRNA COURT HOUSE, AND REACHED THE NORTH ANNA RIVER, ONLY TO FIND THAT LEE HAD ANTICIPATED THIS MOVE, AND WAS HOLDING IMPREGNABLE POSITIONS ON THE SOUTH BANK. GRANT AGAIN MADE A WIDE DETOUR TO THE EASTWARD. MEANWHILE, HIS CAVALRY UNDER SHERIDAN WAS MAKING A DARING RAID IN THE DIRECTION OF RICHMOND TO DRAW OFF LEE'S CAVALRY AND CUT THE ENEMY'S COMMUNICATIONS.

JUNE 3RD, GRANT AND LEE WERE FACING EACH OTHER AT COLD HARBOR. THE SCENE OF McCLELLAN'S OPERATIONS IN '62, ONLY 6 MILES FROM THE DEFENSES OF THE CONFEDERATE CAPITAL. GRANT WAS EAGER TO WHIP LEE'S ARMY BEFORE IT COULD OCCUPY THESE FORTIFICATIONS, AND ORDERED A GRAND ASSAULT UPON THE CONFEDERATE LINE AT ALL POINTS.

ON JUNE 3RD, AT DAYBREAK, THE ATTACK WAS MADE BY 80,000 FEDERALS, BUT THE ASSAULTS WERE DRIVEN BACK WITH DREADFUL LOSSES. AT COLD HARBOR THERE WAS ALMOST CONTINUOUS FIGHTING UNTIL JUNE 12TH. THEN GRANT, FINDING HIS ADVANCE CHECKED, RESOLVED TO MOVE HIS ARMY TO THE JAMES RIVER AND STRIKE AT RICHMOND FROM THAT DIRECTION.

FROM THE RAPID TO THE SLOW, THE ARMY HAD LOST 54,929 MEN, BUT THE CAMPAIGN WENT ON. IN THE MEANTIME, LEE HAD LOST ONLY ABOUT 12,000 MEN. IT WAS HARD TO REPLACE THEM, AS THE FIGHTING POPULATION OF THE CONFEDERATE NORTHERN EXHAUSTED.
